Service Disabled Veteran Owned, SBA Certified Small Disadvantaged, SBA Certified HUBZone

Price list current as of Modification #PO-0010 effective February 24, 2023

Prices Shown Herein are Net (discount deducted)

CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s).

SINs	Recovery	SIN Title
54151S	54151SRC	Information Technology Professional Services
OLM	OLMSTLOC OLMRC	Order-Level Materials (OLM's)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. **Please see page 14 for pricing.**

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item. **Please see pages 5 – 13 for labor category information.**

2. **Maximum order:**

SINs	Maximum Order
54151S	\$500,000
OLM	\$250,000

3. **Minimum order:** \$100

4. **Geographic coverage.** CONUS

5. **Point(s) of production.** 401 Post Office Rd STE 202, Waldorf, MD 20602

6. **Discount from list prices or statement of net price.** Government Net Prices (discounts already deducted.)

7. **Quantity discounts.**

Additional 1% discount off orders that exceed \$500k

2 % discount off orders that exceed \$750k

8. **Prompt payment terms.** Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions. 1.5% Net 10, 1% Net 15

9. **Foreign items (list items by country of origin).** None

10a. **Time of delivery.** To Be Determined at the Task Order level

- 10b. Expedited Delivery. Contact Contractor
- 10c. Overnight and 2-day delivery. Contact Contractor
- 10d. Urgent Requirements. Contact Contractor
11. F.O.B. point(s). Destination
- 12a. Ordering address(es). Same as Contractor
- 12b. Ordering procedures: See Federal Acquisition Regulation (FAR) 8.405-3.
13. Payment address(es). Same as Contractor
14. Warranty provision. Standard 1-Year Warranty
15. Export packing charges, if applicable. Not Applicable
16. Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable
17. Terms and conditions of installation (if applicable). Not Applicable
- 18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not Applicable
- 18b. Terms and conditions for any other services (if applicable). Not Applicable
19. List of service and distribution points (if applicable). Not Applicable
20. List of participating dealers (if applicable). Not Applicable
21. Preventive maintenance (if applicable). Not Applicable
- 22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable
- 22b. If applicable, indicate that Section 508 compliance information is available for the information and communications technology (ICT) products and services and show where full details can be found (e.g. contractor's website or other location.) ICT accessibility standards can be found at:
<https://www.Section508.gov/>. Not Applicable
23. Unique Entity Identifier (UEI) Number. YVW6NE58LJN1
24. Notification regarding registration in System for Award Management (SAM) database. Contractor registered and active in SAM

LABOR CATEGORY INFORMATION

Labor Category	Min. Years of Exp.	Functional Responsibility	Educational Requirements
Analyst Junior	3	Works with multiple IT departments/sources to research, collect, identify and report software or system requirements using interviews, document analysis, requirements workshops, surveys, site visits, business process descriptions, use cases, scenarios, business analysis, task and workflow analysis. Critically evaluates information gathered, reconcile conflicts; decomposes high-level information into detail functional and development or system requirements. Assist IT project managers with project plan, version scopes and timelines Work with development or systems team to implement requirements related to IT projects. Can solve more complex problems with minimal supervision.	Bachelors
Analyst Senior	9	Works with multiple IT departments/sources to research, collect, identify and report software or system requirements using interviews, document analysis, requirements workshops, surveys, site visits, business process descriptions, use cases, scenarios, business analysis, task and workflow analysis. Critically evaluates information gathered, reconcile conflicts; decomposes high-level information into detail functional and development or system requirements. Assist IT project managers with project plan, version scopes and timelines Work with development or systems team to implement requirements related to IT projects. Can solve all problems with no supervision required. Shall supervise junior personnel.	Bachelors
Configuration Specialist	7	Provide configuration/data management, data modeling and configuration control. May also perform software component configuration, analysis, software monitoring, and performance optimization.	Bachelors
Enterprise Architect	15	Designs and develops complex business solutions using a variety of computer technologies. Independently performs a variety of system design and engineering tasks which are broad in nature and are concerned with design and implementation of major enterprise systems development and integration, including supporting personnel, hardware, software, and support facilities and/or equipment. Considered a Subject Matter Expert (SME) in one or more specific areas of computer system design and networking. Applies knowledge of complex concepts and techniques to develop and implement automated solutions to engineering, scientific, or business data acquisition and management problems. Uses scientific and engineering logic to independently identify conceptual or theoretical solutions to problems of technology systems hardware or software design and operation.. Evaluates and recommends optimum solutions balancing specific project needs with economic constraints.. Formulates architectural design,	Bachelors

Labor Category	Min. Years of Exp.	Functional Responsibility	Educational Requirements
		functional specification, interfaces, and documentation of computer systems considering system interrelationships, operating modes, and equipment configurations. Responsible for developing project plans, justifications, guidelines, and controls.	
IT Consultant I	5	Professional providing General IT assistance to help customers achieve a specific solution related to the organization's utilization of information technology products and services. Demonstrates exceptional oral and written communication skills. Can perform minor tasks under supervision.	Bachelors
IT Consultant II	10	Professional providing General IT assistance to help customers achieve a specific solution related to the organization's utilization of information technology products and services. Demonstrates exceptional oral and written communication skills. Can perform more complex tasks under minimal supervision.	Bachelors
IT Consultant III	15	Professional providing General IT assistance to help customers achieve a specific solution related to the organization's utilization of information technology products and services. Demonstrates exceptional oral and written communication skills. Can perform all tasks with no supervision required.	Bachelors
Network Administrator – Junior	3	Sets up, configures, and supports internal and/or external networks. Develops and maintains all systems, applications, security, and network configurations. Troubleshoots network performance issues and creates and maintains a disaster recovery plan. Recommends upgrades, patches, and new applications and equipment. Provides technical support and guidance to users. Familiar with a variety of the field's concepts, practices, and procedures.	Bachelors
Network Administrator – Senior	9	Sets up, configures, and supports internal and/or external networks. Develops and maintains all systems, applications, security, and network configurations. Troubleshoots network performance issues and creates and maintains a disaster recovery plan. Recommends upgrades, patches, and new applications and equipment. Provides technical support and guidance to users. Familiar with a variety of the field's concepts, practices, and procedures.	Bachelors
Network Engineer – Junior	5	Applies extremely complex networking concepts in the analysis, study, and design of data networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans and supervises installations, transitions, and cutovers of network components and capabilities. Reviews existing network designs and capabilities with the goal of making refinements, reducing	Bachelors

		operating overhead, enhancing network throughput, and improving current network topologies.	
Network Engineer – Senior	10	Applies extremely complex networking concepts in the analysis, study, and design of data networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans and supervises installations, transitions, and cutovers of network components and capabilities. Reviews existing network designs and capabilities with the goal of making refinements, reducing operating overhead, enhancing network throughput, and improving current network topologies.	Bachelors
Program Manager	10	Responsible for large projects\programs or significant segment of a large complex project\program. Leads team on large projects\programs or significant segment of large complex projects\programs. Translate customer requirements into formal agreements and plans to culminate in customer acceptance of results or have acceptance in the targeted market, while meeting business objectives. Works with client to identify business requirements and develops the proposal. Subsequently leads a team in the initiating, planning, controlling, executing, and closing tasks of a project\program or segment of a project\program to produce the solution deliverable. Executes a wide range of process activities beginning with the request for proposal through development, test, and final delivery. Formulates partnerships between customer, suppliers, and staff. Anticipates potential project\program related problems. Utilizes refined techniques for identifying, eliminating, or mitigating solution, project\program, and business risk. Understands customer, industry, and business trends. Applies this understanding to meet project\program objectives. As appropriate, challenges the validity of given procedures and processes with a view toward enhancement or improvement. Analyzes information and situations and implement actions, independently and or through the management team to ensure project\program objectives are met. Analyzes new and complex project\program related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components. . Able to manage all programs with no supervision required.	Bachelors
Project Manager	7	Responsible for assisting the management of small to med- sized projects. Assists in preparing implementation plan, coordinates activities, monitors milestones, and provides progress reports. Creation and management of project information related to contractual requirements and cost for submittal to the program	Bachelors

Labor Category	Min. Years of Exp.	Functional Responsibility	Educational Requirements
		<p>manager for review and approval. Must have rudimentary understanding of accounting, management, and contract principles.</p> <p>Performs day-to-day management of assigned delivery order projects that involve teams of data processing and other information system and management professionals who have previously been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information and telecommunications systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, directs, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills. Able to manage more complex projects with no supervision required.</p>	
Information Assurance Subject Matter Expert I	5	<p>Has advanced understanding of area of expertise related to Information Assurance disciplines. Provides expert consultative support to a functional technical area of the project. Develops solutions to complex problems. Works closely with the team to identify the best solution to organizational, process or technical issues. Familiar with a specific field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals.</p> <p>Performs complex analysis using classified and unclassified source data to proactively identify threat vectors. Provides expert level analysis for adversary capabilities, intentions, techniques, tactics, and procedures (TTP), and be used to author and redistribute cyber intelligence information, fuse cyber intelligence data into SOC monitoring systems, and provide situational awareness to other members of the cybersecurity team, communicate methods for detecting specific threats, and plan operations to mitigate or disrupt the threat as part of the overarching enterprise Computer Network Defense (CND). Designs, leads, or supports cybersecurity exercises.</p> <p>Provides oversight of incident data flow and response, content, and remediation, and partners with other incident response centers in maintaining an understanding of threats, vulnerabilities, and exploits that could impact networks and assets. Performs proactive security monitoring and reporting on various security enforcement systems, such as SIEM, Anti-virus, Internet content filtering/reporting, malware prevention, Firewalls, IDS & IPS, Web Security, etc.</p> <p>Conducts support under general supervision.</p>	Bachelors

		<p>compatible and in compliance with the standards for open systems and DOD architectures. Determines and identifies high-level functional and technical requirements based on interactions with the user community and knowledge of the enterprise architecture. Identifies, assesses, and presents options for meeting the functional and technical requirements including hardware and software updates or upgrades. Interacts with project management to plan project schedules and technical direction. Develops software design documents and technology white papers. Provides recommendations during the selection of development tools. Formulates and defines specifications for operating system applications or modifies and maintains existing applications using engineering releases and utilities from the manufacturer. Creates a positive client support experience and builds relationships through deep problem understanding, ensuring timely resolution. Monitors systems and peripheral equipment, system processing, and error listings to maintain control of hardware and software malfunctions. Responds to trouble calls, analyzes problems with software and hardware, and takes appropriate action to correct problems. Assists users with computers, network, and application-related issues and may provide training in areas such as database, security, and LAN administration</p>

		malfunctions. Establishes direct communication and rapport quickly and effectively with groups and individuals and maintains effective working relationships.	
Information Technology Specialist V	12	Contributes programmatic insights and best practices related to analytical approaches to meet client needs; provides guidance and supervision of mid-level and other senior staff. Contributes to selection of most appropriate methods and analytical approaches, and programmatic expertise on large, complex multi-faceted analytical needs of clients; directs or oversees teams lead by senior staff; provides expert technical review. Support specifically providing Configuration Management/Data Management for all technical data to include operational system, subsystem, and component requirement documentation, technical development and design documentation, plans, test plans, specifications, procedures, and reports. Configuration Management shall include change control, action tracking, trouble report tracking and metrics collection, analyses, and reporting.	Masters
Technical Writer	5	Works with management, technical personnel, authors, and subject matter experts to define documentation content, guidelines, specifications, and development schedules. Prepares required documentation in an appropriate format. Adheres to required configuration management or quality assurance standards of associated IT projects. Analyzes the data and user requirements to ensure that documentation is clear, concise, and valid. Ensures that documents follow the appropriate style guide.	Bachelors
