LABOR CATEGORY	GSA PRICE
Technical Writer	$87.95

1c.

LABOR CATEGORY	EXP	DESCRIPTION	EDUCATION
Applications Developer (Senior)	4	Plans and leads major technology assignments. Functions as a technical expert across multiple project assignments. May supervise others. Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Assists in the evaluation and recommendation of application software packages, application integration and testing tools.. Acts as team leader on projects. Instructs, assigns, directs, and checks the work of other software developers on development team.	Bachelor's Degree
Applications Developer (Master)	5	Provides technical/management leadership on major tasks or technology assignments. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met.	Bachelor's Degree or Master's

		Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others. Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Assists in the evaluation and recommendation of application software packages, application integration and testing tools.. Acts as team leader on projects. Instructs, assigns, directs, and checks the work of other software developers on development team.	
Application Systems Analyst (Senior)	4	Plans and leads major technology assignments. Functions as a technical expert across multiple project assignments. May supervise others. Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results. Prepares detailed specifications for programs. Assists in the design, development, testing, implementation, and documentation of new software and enhancements of existing applications. Works with project managers, developers, and end users to ensure application designs meet business requirements. Designs, codes, tests, debugs, and documents those programs. Led and supports evaluation of new and existing software products.	Bachelor's Degree
Applications Systems Analyst (Master)	5	Provides technical/management leadership on major tasks or technology assignments. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others. Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results. Prepares detailed specifications for programs. Assists in the design, development, testing, implementation, and documentation of new software and enhancements of existing applications. Works with project managers, developers, and end users to ensure application designs meet business requirements. Designs, codes, tests, debugs, and documents those programs. Led and supports evaluation of new and existing software products.	Bachelor's Degree or Master's
Business Process Consultant	3	(a) Analyzes process and re-engineering, with an understanding of technical problems and solutions as they relate to the current and future business environment.Creates process change by integrating new processes with existing ones and communicating these changes to impacted Business Systems teams. (c) Recommends and facilitates quality improvement efforts	Bachelor's Degree
Business Systems Analyst	3	Elicit business requirements and translate to functional and technical requirements. Lead Scope analysis and project planning. Lead project communications throughout the lifecycle of a project. Participate in project planning or oversight activities for assigned projects and initiatives. Creating and maintaining of project and systems documentation and artifacts to support established and future business applications throughout all phases of the software life-cycle. Develop process flow diagrams. Develop and document current and new processes. Prepare test plans consisting of test cases, and other documentation to support testing. Lead and conduct functional, regression, environment and accessibility testing. Oversee User Acceptance Testing	Bachelor's Degree

		(UAT). Document and track test results and track defects through resolution. Provide training and documentation to users on the functionality of developed applications and processes. Provide software lifecycle support and production support services. Perform a variety of research and analysis tasks and documentation as identified.	
Database Specialist (Senior)	4	Plans and leads major technology assignments. Functions as a technical expert across multiple project assignments. May supervise others. Provides all activities related to the administration of computerized databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Designs, creates, and maintains databases in a client/server environment along with data and user security. Designs, implements, and maintains complex databases with respect to JCL, access methods, access time, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, overall monitoring of standards and procedures, file design and storage, and integration of systems through database design.	Bachelor's Degree
Database Specialist (Master)	5	Provides technical/management leadership on major tasks or technology assignments. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others. Provides all activities related to the administration of computerized databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Designs, creates, and maintains databases in a client/server environment along with data and user security. Designs, implements, and maintains complex databases with respect to JCL, access methods, access time, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, overall monitoring of standards and procedures, file design and storage, and integration of systems through database design.	Bachelor's Degree or Master's
Information Assurance/Security Specialist (Senior)	4	Plans and leads major technology assignments. Functions as a technical expert across multiple project assignments. May supervise others. Determines enterprise information assurance and security standards. Develops and implements information assurance/security standards and procedures. Coordinates, develops, and evaluates security programs for an organization. Recommends information assurance/security solutions. Identifies, reports, and resolves security violations. Performs analysis, design, and development of security features for system architectures. Analyzes and defines security requirements for computer systems which may include mainframes, workstations, and personal computers. Designs, develops, engineers, and implements and/or integration of solutions that meet security requirements. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development lifecycle.	Bachelor's Degree
Information Assurance/Security Specialist (Master)	5	Provides technical/management leadership on major tasks or technology assignments. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others. Determines enterprise information assurance and security standards. Develops and implements information assurance/security standards and procedures.	Bachelor's Degree or Master's

		Coordinates, develops, and evaluates security programs for an organization. Recommends information assurance/security solutions. Identifies, reports, and resolves security violations. Performs analysis, design, and development of security features for system architectures. Analyzes and defines security requirements for computer systems which may include mainframes, workstations, and personal computers. Designs, develops, engineers, and implements and/or integration of solutions that meet security requirements. Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle.	
Project Manager	2	Leads team on large projects or significant segment of large complex projects. Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components. Provides applications systems analysis and programming activities for a Government site, facility or multiple locations. Prepares long and short-range plans for application selection, systems development, systems maintenance, and production activities and for necessary support resources. Oversees all aspects of projects.	Bachelor's Degree
Subject Matter Expert (Senior)	4	Plans and leads major technology assignments. Functions as a technical expert across multiple project assignments. May supervise others. Serves as subject matter expert, possessing in-depth knowledge of a particular area, such as business, computer science, engineering, mathematics, or the various sciences. Provides technical knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation and implementation advice on exceptionally complex problems that need extensive knowledge of the subject matter for effective implementation. Applies principles, methods and knowledge of the functional area of capability to specific task order requirements, advanced mathematical principles and methods to exceptionally difficult and narrowly defined technical problems in engineering and other scientific applications to arrive at comprehensive solutions.	Bachelor's Degree
Subject Matter Expert (Master)	5	Provides technical/management leadership on major tasks or technology assignments. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others. Serves as subject matter expert, possessing in-depth knowledge of a particular area, such as business, computer science, engineering, mathematics, or the various sciences. Provides technical knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation and implementation advice on exceptionally complex problems that need extensive knowledge of the subject matter for effective implementation. Applies principles, methods and knowledge of the functional area of capability to specific task order requirements, advanced mathematical principles and methods to exceptionally difficult and narrowly defined technical problems in engineering and other scientific applications to arrive at comprehensive solutions.	Bachelor's Degree or Master's
Systems Engineer	2	Provides analysis related to the design, development, and integration of hardware, software, man-machine interfaces and all system level requirements to provide an integrated IT solution. Develops integrated system test requirement, strategies, devices and systems. Directs overall system level testing.	Bachelor's Degree
Test Engineer (Senior)	5	Developing test scripts. Generating test data. Data Validation. Execute regression, functional, load and system testing.	Bachelor's Degree

		Verifying results and producing test summaries and defect reports. Identifying defects and requirement discrepancies. Generating defect change requests and reporting discrepancies.	
Biometrics Consultant	3	Provide program and technical advisory services in a variety of subject areas to include Multi-Modal Biometric initiatives, biographic processes, biometrics research and evaluation, biometrics architecture and design, and more. Data quality and integrity support for new and existing company initiatives. Review existing data systems, software, applications, data retrieval, architecture and other functions as necessary and provide with suggested alternatives to better leverage advanced entity information to preposition biometric and biographic data that allows for 1:n biometric matching while still accomplishing determined service level requirements.	Bachelor's Degree
Data Consultant	3	Responsible for standardizing data collection and report generation, working closely with client to assist in managing data needs, and supporting collection of data needed for various operational needs. Data querying, analysis, problem solving, investigation and creative thinking with massive amount of data as a focal point. Responding to data queries/analysis requests from various groups within an organization. Creating and publishing regularly scheduled and/or ad hoc reports as needed. Document reporting requirements and process and validate data components as required. Providing data analysis for understanding and interpreting various operational data for the organization. Query, capture and analyze meaningful and operationally actionable information from very large scale relational or unstructured databases. Store and transfer data as required by requester. Utilizing SQL to extract and analyze data from various sources.	Bachelor's Degree
Technical Writer	1	Collaborating with internal teams and stakeholders to obtain an in-depth understanding of the product and the documentation requirements for software applications and systems engineering. Analyze existing and potential content, focusing on reuse and single-sourcing opportunities. Create and maintain the information architecture. Writing technical documentation, such as, functional descriptions, system specifications, special reports, and other customer deliverables and documents. Produce high-quality documentation that meets applicable standards and is appropriate for its intended audience. Write easy-to-understand user interface text, online help and developer guides. Create tutorials to help end-users use a variety of applications. Responsible for reviewing documents for technical accuracy in accordance with applicable regulations. Responsible for organizing information for the preparation of design documents, user manuals, installation guides, and requirement documents as well as managing/maintaining documentation within a structured central repository.	Bachelor's Degree
Solutions Expert	6	A Solutions Expert (SE) is an individual whose qualifications and/or particular expertise are exceptional and/or highly unique. SE do not have specific experience/education qualifications, but are typically identified as recognized Industry leaders for a given area of expertise. SE typically perform the following kinds of functions: Initiates, supervises, and/or develops requirements from a project's inception to conclusion for complex to extremely complex programs; Provides strategic advice, technical guidance and expertise to program and project staff; Provides detailed analysis, evaluation and recommendations for improvements, optimization development, and/or maintenance efforts for client-specific or mission critical challenges/issues; Consults with client to define need or problem supervises studies and leads surveys to collect and analyze data to provide advice and recommend solutions.	Bachelor's Degree or Master's

2. Maximum order. 54151S: $500,000; OLM: $250,000

3. Minimum order. $100.00

4. Geographic coverage (delivery area). 50 United States; District of Columbia; Puerto Rico

5. Point(s) of production (city, county, and State or foreign country). Not Applicable

6. Discount from list prices or statement of net price. Net prices set forth above.

7. Quantity discounts. 1% for orders over $300,000

8. Prompt payment terms. Net 30

9. Foreign items (list items by country of origin). None.

10a. Time of delivery. (Contractor insert number of days.) As negotiated with ordering agency and the contractor.

10b. Expedited Delivery. As negotiated with ordering agency and the contractor.

10c. Overnight and 2-day delivery. As negotiated with ordering agency and the contractor.

10d. Urgent Requirements. As negotiated with ordering agency and the contractor.

11. F.O.B. point(s). Destination.

12a. Ordering address.
23392 Summerstown Pl
Dulles, VA 20166-2178

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address.
23392 Summerstown Pl
Dulles, VA 20166-2178

14. Warranty provision. None.

15. Export packing charges, if applicable. Not Applicable

16. Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable

17. Terms and conditions of installation (if applicable). Not Applicable

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not Applicable

18b. Terms and conditions for any other services (if applicable). Not Applicable

19. List of service and distribution points (if applicable). Not Applicable

20. List of participating dealers (if applicable). Not Applicable

21. Preventive maintenance (if applicable). Not Applicable

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: www.Section508.gov/. www.it-strat.com

23. Data Universal Number System (DUNS) number. 127195738

24. Contractor is registered in the SAM database. Valid and current

Final Pricing:
The rates shown below include the Industrial Funding Fee (IFF) of 0.75%.

Service Contract Labor Standards : The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Professional Services Schedule (PSS)Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
