

BELFOR Property Restoration is a full service Emergency Response and Restoration Company, providing a full range of services to reduce the impact of an unplanned event leading to real property or personal property damage. Services offered include:

Emergency Response: Specific tasks to include:

- **Immediate Response** – Upon contacting our Government Program Manager, a team of professional damage assessment personnel will be on site within 24 hours.
- **Analysis and Damage Assessment** – After reaching the site of the emergency our team will quickly assess and determine the scope of the damages and provide this information to the on site government personnel.
- **Statement of Work** – The scope of the damages and the recommendations on how to remediate the situation will be provided in a written Statement of Work.
- **Mobilization** – Upon acceptance of our recommendations, BELFOR will immediately mobilize its team to begin work on site.
- **Work Product** – Work on site by BELFOR first responder team members will encompass any one or all of the Scope of Services listed below.
- **Project Summary** – When the project has come to an end, a full report of the actual damages incurred and work completed will be provided to the appropriate government personnel.

Structural Drying: Specific tasks to include:

- Tarping of structures to control inflow of moisture
- Shrink wrapping of structures to control inflow of moisture
- Water Extraction to remove excess water from a structure
- Moisture Mapping – to determine impacted areas of a structure
- Selective Demolition to remove wet building materials that cannot be economically dried in place
- Containment – to assure that potential contaminants do not spread
- Evaporation Enhancement – to remove moisture content from building materials

- Dehumidification – to remove excess water vapor from the structures environment

PROPERTY RESTORATION

- Temperature Control – to assist in dehumidification and to prevent the onset of mold growth
- Post Drying Cleaning – to remove any potential contaminants from dried building materials

Mold Remediation: Specific tasks to include:

- Work planning with Industrial Hygienist to develop cost effective removal protocol
- Containment – to eliminate the potential for cross contamination
- Air Flow Management – to eliminate the potential for cross contamination and to provide data that will support the affectivity of containment (through continuous pressure differential monitoring)
- Selective Demolition – to remove impacted building materials
- Detailed Cleaning – to remove contamination through HEPA Vacuuming, Scrubbing and appropriate chemical washing
- Ice or Soda Blasting – to provide for thorough and economical cleaning of building materials when there are large areas impacted
- HVAC Cleaning – to remove contamination from these systems

Fire Restoration and Clean Up: Specific tasks to include:

- Detailed Cleaning – to remove excess soot or other contaminants from impacted areas through HEPA Vacuuming, dry sponging or through chemical washing
- Selective Demolition – to remove unsalvageable materials or property
- Pack Outs – to remove salvageable personal property from the affected area for off site cleaning and storage
- Air Flow Management – to remove airborne contaminants and soot, and to reduce offensive odors
- Deodorization – to remove or mask offensive odors and return the affected area to a usable space

Electronics and Machinery Restoration: Specific tasks to include

- Assessment of damaged equipment to develop a cost effective plan for restoration or replacement
- Disassembly of equipment for detailed cleaning
- Detailed Cleaning of equipment through HEPA vacuuming, chemical washing and appropriate methods for contamination free drying
- Reassembly of equipment after it has been cleaned and dried

- Testing of equipment to assure that it is functioning properly
