**Corporate Background:**

Rees Scientific Corporation was founded in 1982 and has devoted the course of its product development and service to protecting the world's research and healthcare. We have worked closely with the US Government, hospitals, blood banks, research facilities, contract research organizations and the world's major pharmaceutical companies in order for them to meet the stringent industry and governmental regulatory requirements. We believe strongly in responding to our customer's requests for proactive involvement in meeting emerging regulatory guidelines. We are the industry leader in monitoring systems that comply with 21 CFR 11 and are acutely aware of the emerging guidance from the Good Automated Manufacturing Practices ("GAMP") Forum.

Rees Scientific has approximately 100 employees worldwide both in sales and service that work closely with our customers. All our products are manufactured in our 25,000 square foot facility in the suburbs of Trenton NJ. We are an industry leader in providing monitoring to the scientific and research communities. Rees Scientific has a fully staffed research and development department consisting of engineers and software writers. Our sales and service teams are managed both regionally and nationally. We offer twenty-four hour technical support to our customers with a factory-trained employee. We continue to listen to our customers needs and through our quality department make improvements to help satisfy our customer's needs.

**Overview:**

Over the past three years Rees Scientific has expanded on its current Centron product line. We have introduced software/hardware improvements and a variety of service packages to meet current regulations for a growing industry. We have evaluated and improved our line of sensors for a variety of monitoring needs. We have researched and placed service personnel strategically to better service our customers. These service personnel have well stocked service vehicles with parts to ensure a fast and prompt service response. They continue to attend yearly trainings to keep them up on the latest technology. We have completely renovated our facility to better equip our personnel to provide the best in manufacturing and customer service. We continue to maintain our ISO-9001 certification.

**Accounting Controls:**

Rees Scientific has an accounting department overseen by the Controller of the company. This department is staffed by 6 in house personnel and handles all order entry and invoicing for the company. The company is setup to handle payment via check, electronic payment and credit card. Routine audits ensure that policy and procedure is strictly adhered to.

The company has a President, Vice President, Operations Manager as well as other department heads that make up the management team. This team meets on a regular basis to discuss improvements and go over data in relation to the company.

**Market Plan:**

Services will be marketed by expanding on our large existing government base of customers. These include the Army, Navy, Air Force, VA medical Centers and other organizations such as the National Institutes of Health and National Cancer Institute.

We market primarily through word of mouth and experience, trade shows, trade journals and magazines. Marketing is handled by both an in house marketing staff and the 23 sales people that cover all territories worldwide.

**Delivery Order Management Controls:**

Orders are received and reviewed by our order entry department. Policies and procedures exist for their review and processing. Our Operations Manager in conjunction with the President handles larger contracts and their negotiation. Once an order is entered our production staff manufacturers or pulls from stock the proper products to ship. Our project management department assigns an in house account manager to each customer. They direct the production department with when to ship product, assign the installation and service team and schedule and interface with the customer to ensure satisfaction.

<b>REES SCIENTIFIC CORPORATION</b> <b>SCIENTIFIC EQUIPMENT AND SERVICES ITEM NUMBER DESCRIPTIONS</b>
---

**333999 --- Animal Caging Equipment**

Includes animal cages and caging systems intended for the care, study and storage of animals that are used in the research biomedical laboratory environment. NOTE: Food and water delivery systems may be included, but not the food or water itself. Items referred to as "metabolic cages" are also included, but devices for animal restraint, surgery or dissection are excluded.

**334516 --- Analytical Instruments**

Includes analytical equipment for laboratory use, such as testing equipment, etc. NOTE: Subject to Cooperative Purchasing

**532490L --- Laboratory Maintenance, Repair, Leasing and Warranties**

Includes products for lab maintenance, repair, leasing, and warranties, such as equipment maintenance, repair and service; calibration and calibration traceability certificate; extended warranties; etc. NOTE: Prior to purchase, and if no other options are requested, the manufacturer's standard calibration is provided with a certificate of calibration and a calibration sticker.

**ANCILLARY--- Ancillary Supplies and Services**

Ancillary supplies and/or services are support supplies and/or services which are not within the scope of any other SIN on this schedule. These supplies and/or services are necessary to compliment a contractor's offerings to provide a solution to a customer requirement. This SIN may be used for orders and blanket purchase agreements that involve work or a project that is solely associated with the supplies and/or services purchased under this schedule.

**BEST VALUE  
BLANKET PURCHASE AGREEMENT  
FEDERAL SUPPLY SCHEDULE**

**(Insert Customer Name)**

In the spirit of the Federal Acquisition Streamlining Act  
\_\_\_\_\_(Agency)\_\_\_\_\_ and \_\_\_\_\_(Contractor)\_\_\_\_\_ enter into a cooperative agreement to further reduce the administrative costs of acquiring commercial items from the General Services Administration (GSA) Federal Supply Schedule Contract(s) \_\_\_\_\_.

Federal Supply Schedule contract BPAs eliminate contracting and open market costs such as: search for sources; the development of technical documents, solicitations and the evaluation of offers. Teaming Arrangements are permitted with Federal Supply Schedule Contractors in accordance with Federal Acquisition Regulation (FAR) 9.6.

This BPA will further decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from the schedule contract. The end result is to create a purchasing mechanism for the **Government that works better and costs less.**

**Signatures**

AGENCY	DATE	CONTRACTOR	DATE

(3) The Government estimates, but does not guarantee, that the volume of purchases through this agreement will be \_\_\_\_\_.

(4) This BPA does not obligate any funds.

(5) This BPA expires on \_\_\_\_\_ or at the end of the contract period, whichever is earlier.

(6) The following office(s) is hereby authorized to place orders under this BPA:

**OFFICE**

**POINT OF CONTACT**

\_\_\_\_\_  
\_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

(7) Orders will be placed against this BPA via Electronic Data Interchange (EDI), FAX, or paper.

(8) Unless otherwise agreed to, all deliveries under this BPA must be accompanied by delivery tickets or sales slips that must contain the following information as a minimum:

(a) Name of Contractor;

(b) Contract Number;

(c) BPA Number;

(d) Model Number or National Stock Number (NSN);

(e) Task/Delivery Order Number;

(f) Date of Purchase;

(g) Quantity, Unit Price, and Extension of Each Item (unit prices and extensions need not be shown when incompatible with the use of automated systems; provided, that the invoice is itemized to show the information); and

(h) Date of Shipment.

(9) The requirements of a proper invoice are specified in the Federal Supply Schedule contract. Invoices will be submitted to the address specified within the task/delivery order transmission issued against this BPA.

(10) The terms and conditions included in this BPA apply to all purchases made pursuant to it. In the event of an inconsistency between the provisions of this BPA and the Contractor's invoice, the provisions of this BPA will take precedent.
