## Special Item Number (SIN) Descriptions

**246-20-3:** Miscellaneous Alarm and Signal Systems. Audible/Visual Warning/Signaling Devices - including radio alarms equipment (excluding those for vehicular use).

**246-25:** Fire Alarm Systems - (Excludes Fire Suppression Devices).

**246-35-1:** Access Control Systems, Door entry control by card access, magnetic proximity - including but not limited to Biometric.

**246-35-2:** Access Control Systems, Door entry control by touch access, dial, digital, keyboard, keypad - including but not limited to Biometric, Voice, Fingerprint, Iris, Hand Geometry, Weight.

**246-35-5:** Access Control Systems - Vehicle Arrest/Security Barrier/Barricade/Bollard Systems, Decorative Barrier Planters.

**246-36:** Locking Devices - including padlocks and electronic locks not covered by SIN 246-35

**246-40:** Intrusion Alarms and Signal Systems - Including audible and visible warning devices (no personal alarms).

**246-42-1:** Facility Management Systems - (Including Accessories and Repair Parts. Computerized Systems for Surveillance, Monitoring, Controlling, Signaling and Reporting Multiple Functions. Security Functions (i.e., access control, fire detection, intrusion, etc.).

**246-42-2:** Facility Management Systems - (Including Accessories and Repair Parts. Computerized Systems for Surveillance, Monitoring, Controlling, Signaling and Reporting Multiple Functions. Energy and Facility Management Functions and Services, Building Automation Control systems (including lighting, HVAC controls and sensors), Building Comfort Systems (including heating, ventilation and air conditioning, chillers)

**246-42-3:** Facility Management Systems - including accessories and repair parts. - Computerized systems for surveillance, monitoring, controlling, signaling and reporting multiple functions. Systems capable of both security functions and energy management functions.

**246-43:** Perimeter Security/Detection Systems - including but not limited to Fencing, Sensors, etc.

**246-1000:** Ancillary Services relating to Security/Facility Management Systems - Including services necessary to install the system (design through startup), maintain the system (including maintenance agreements, or training). Excludes construction.

Includes, but is not limited to: services necessary to install the system (from design through start-up), maintain the system (including maintenance agreements, which may not exceed the term of this contract), or training.

Ancillary Service EXCLUDES:

- Construction (construction is defined as alteration, or repair of buildings, structures, or other real property)
- Architectural Engineering Services (A&E) under the Brooks Architect-Engineers Act as stated in Federal Acquisition Regulation (FAR) Part 36. These services shall be ordered only in

accordance with Part 36 and agency procedures, and shall not be included on a GSA contract order as an open market item.

- Personal services.
- Stand-alone services which are applicable to the Service Contract Act (SCA)

The ordering agency is responsible for:

- Defining and issuing the statement of work for ancillary services. Accurate definition of the scope and statement of work is essential to facilitate realistic quotations. The statement of work shall also inform the contractor of any applicable insurance requirements.
- Ordering agencies shall obtain pricing information from the schedule contractors, and will negotiate for ancillary services on an order by order basis, based on complexity and level of effort. Ancillary services shall be priced as separate line items on each order.
- Pricing of services has been determined fair and reasonable by GSA. However, ordering agencies shall make a determination that the total price is fair and reasonable based on the level of effort and the mix of labor proposed.
- Ordering agencies will comply with all appropriation laws and ensure that the correct types of funds are obligated on each order.

**246-51: Installation of Security/Facility Management Systems Requiring Construction.**

INCLUDES: Installation which requires construction.

Note: Ancillary services involving installation which do not meet the definition of construction as defined in FAR 2.101 shall be covered under SIN 246-1000.

Note: This SIN specifically EXCLUDES Architectural Engineering Services (A&E) under the Brooks Architect-Engineers Act as stated in Federal Acquisition Regulation (FAR) Part 36. These services shall be ordered only in accordance with Part 36 and agency procedures, and shall not be included on a contract order as an open market item.

When placing orders for services under this SIN, Ordering Agencies shall follow the procedures at FAR 8.405: The ordering agency is responsible for:

- Complying with all Federal Appropriation Laws and ensuring the correct types of funds are obligated on the order.
- When construction, alteration or repair of public buildings or public works is to be performed under this SIN, Ordering Agencies must comply and ensure contractor compliance with the Construction Clauses and Davis-Bacon Regulations. See Appendix 1 of the GSA solicitation for a complete listing of the FAR and GSAM Clauses incorporated by reference for all schedule contractors awarded this SIN. Ordering agencies shall utilize these clauses as a guideline and shall incorporate the applicable clauses into the statement of work for orders issued against the Federal Supply Schedule contract. The ordering agency is responsible for including the most current version of these clauses and any other applicable clauses into the order. Clauses which require "fill-ins" shall be completed by the ordering agency. Any agency specific clauses which may apply based on agency regulations or requirements shall be incorporated in the agency task order.

- Defining and issuing the statement of work for services, including installation and site preparation. It is essential that the ordering agency's statement of work includes an accurate description of the work requirement to facilitate realistic quotations.
- The statement of work shall clearly inform the contractor of all bonding requirements and any required insurance amounts.
- The ordering agency will provide the local Davis-Bacon wage rates to contractors. Applicable wage determinations will be incorporated into the statement of work and resulting task order.
- Reviewing quotations from schedule contractors to ensure the work proposed meets the statement of work requirements. The ordering agency should request the contractor to submit fixed price quotes to perform the services.
- The ordering agency shall evaluate all responses received using the evaluation criteria provided to the schedule contractors. The ordering agency is responsible for considering the level of effort and the mix of labor proposed to perform a specific task being ordered, and for determining that the total price is reasonable.
- Performance clauses shall be modified for each job by the ordering agency.
- Administration of orders issued under this Special Item Number.
- All orders and payments must be made to the schedule contractor or their designee.  
Example: A contractor may designate a participating dealer to receive payment.

**246-52:** Security Consulting/Training and Facility Management Consulting. Professional Services offered under this SIN shall be for the support of security systems (including access control, intrusion alarms, fire alarm systems, etc.) and Facility Management Systems (including security and energy management) only. EXCLUDES personal services.

**246-53:** Facility Management and Energy Solutions - Includes, but not limited to projects using appropriated funds as well as alternative financing methods through the use of Energy Savings Performance Contracts (ESPC's) in accordance with the National Energy Conservation Policy Act (NECPA) as amended by the Energy Policy Act of 2005 (EPACT). Projects include energy audits, project management, and energy upgrades of HVAC, Lighting, Controls, etc.

Return of Equipment Upon Expiration of the Lease Term: Prior to award of the lease, the ordering agency is advised to negotiate with the Contractor any costs for dismantling or removal of a leased or rented equipment.

If the Government does not purchase the equipment by the expiration of the lease term, the equipment shall remain the property of the Contractor and the Contractor shall resume possession. The Contractor is required to remove the equipment within 30 days of completion of the lease term unless otherwise agreed upon by the ordering agency.

**APPLIES WHEN SIN 246-53 IS UTILIZED FOR ENERGY SAVINGS PERFORMANCE CONTRACTS ONLY**

CAPITAL LEASES MAY BE PERFORMED UNDER THIS SIN FOR A PERIOD NOT TO EXCEED 25 YEARS FOR THE SOLE PURPOSE OF ENERGY SAVINGS PERFORMANCE CONTRACTS, SUBJECT TO THE FOLLOWING CONDITIONS:

- Agencies utilizing this SIN for Energy Savings Performance Contracts are required to have obtained any required approvals under 42 USC 8287.

- Annual Energy Audits are required. The audit is required to be performed utilizing the North American Measurement and Verification Protocol. Steps in the audit process include: Baseline Verification, Post-Installation Verification, and regular Interval Post-Installation Verification. Required energy audits shall be included in the lease payment quoted by the contractor in response to the agency's scope of work.
- Terms and Conditions of the Performance Guarantee shall be specified by the contractor in their response to the agency's scope of work. This guarantee shall, at a minimum, provide that the contractor is responsible for maintenance and repair services for any energy related equipment installed under this agreement (including computer software systems). **The contractor shall guarantee a minimum amount of energy savings per year.** Shall the minimum savings amount not be met, the difference shall be paid to the agency within 30 days of the end of the yearly period.
- Aggregate annual payments made by an agency to both the utility and energy savings performance contract may not exceed the amount that the agency would have paid for utilities without an energy savings performance contract during the life of the agreement.
- Guaranteed savings must exceed the debt service requirements.
- If the cancellation ceiling exceeds \$10,000,000, the agency shall provide written notification to Congress in accordance with the National Energy Conservation Policy Act Requirements (42 USC 8287).
- Customer agencies shall have the right to place additional requirements within the scope of this contract in their statement of work. Any maintenance agreement performed under this provision shall be effective for the duration of the lease, unless otherwise specified by the agency in their scope of work. The agency shall obtain title to the equipment following the final lease payment
- The agency shall have the option of "buying out" the lease at any period during the lease. The buy-out amount shall be the remaining residual value.

## SPECIAL PROVISIONS

This lease is for the number of years stated in the delivery order. The Government has the right to terminate this contract for convenience or default in the accordance with Federal Acquisition regulation Part 49.

In the event that the lease is terminated for lack of funding, the Government may purchase the leased equipment for the residual value within 30 days of receipt of invoice from the vendor or may elect not to purchase the leased equipment. Alternatively, if the equipment is not purchased, the Government shall permit the lessor to enter the premises and remove all or any portion of the leased equipment the lessor may choose. Any equipment not removed shall become the property of the Government.

## CANCELLATION CEILING

Should the lease be completely terminated for convenience (for any reason other than the aforementioned lack of funding), the Government shall purchase the leased equipment for the residual value. The residual value shall be determined by utilizing the standard payments function on the commercially available spreadsheet program (e.g. Lotus 1-2-3, Excel, etc.) The contractor shall provide the Government a table detailing the yearly estimated residual value based on the interest rate quoted to the Government at the time of the Statement of Work.

In the event of a partial termination for convenience, the Government and the lessor shall negotiate a reasonable compensation to the lessor for the residual value of the leased equipment included in the terminated portion of the lease.

### PERFORMANCE DELAYS

The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine, restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the Contracting Officer in writing as soon as it is reasonably possible after the commencement of any excusable delay, setting forth the full particulars in connection therewith, shall remedy such occurrence. Any delays caused by the Government in its contractual capacity shall be dealt with in accordance with Federal Acquisition Regulation 42.13. Notwithstanding this provision, the Contractor shall not be entitled to any adjustment in the term or price of the lease arising from delays caused by the Government unless a detailed Critical Path Method Schedule was provided to the Government at the start of the project and updated regularly by the Contractor.

### ORDERING PROCEDURE

- Contractor performs feasibility analysis.\*
- Contractor performs preliminary energy audit.\*
- Contractor and Agency enter into agreement for the Contractor to perform a detailed energy audit. \*\* The procedures and price of this audit shall be conducted in accordance with CSP-1 Commercial Sales Practices Format (Number 4).
- Contractor shall present detailed project design, showing the proposed scope of work. In addition to the design, the Contractor shall present a proposed price for the work to be performed. The price shall consist of product prices, and labor prices (to be negotiated in accordance with CSP -1 Commercial Sales Practices Format). The monthly payment shall be calculated by the Contractor utilizing the contractual rate of interest.
- Upon agreement of the price and scope of work, a delivery order shall be issued by the ordering agency.
- Upon acceptance of the work, the guarantee period shall begin.

\*Agency will determine which contractor offers the best value after these two steps. No cost to the agency for these services.

\*\*Cost of the detailed energy audit may be paid for by the agency or rolled into the lease agreement.

**246-60-1:** Security Systems Integration and Design Services. Services involving the security integration and/or management discipline which supports security products or systems through their life cycle. Security systems integration and design services may include, but are not limited to those associated with the design, test, production, fielding, sustainment, improvement of cost effective security and/or protection systems including the eventual disposal or salvage of these systems. Services may include studies and analysis such as - risk assessment, threat evaluation, and assessment (including resultant deliverables). Contractors may provide security or protection expertise in the pre-production or design phase of security or protection systems to ensure that the system can be supported through its life-cycle and that the infrastructure elements necessary for

---

operational support are identified and acquired. These services may continue through the life cycle of the system or product and may include guidance, assistance and/or operational support. This includes all necessary security management elements.

**246-60-2:** Security Management and Support Services - Services providing the best practices, technologies and methodologies to plan, design, manage, operate and maintain secure and protected systems, equipment, facilities and infrastructures. Agency orders may include complete turnkey operations, maintenance and support services, or components thereof as needed to ensure secure and protected systems involving personnel security, physical access, and information security, and reduce life cycle costs. Contractor personnel carrying out these activities, to include management and operating staffs, are not involved with or responsible for the core business of the customer agency placing the order.

**246-60-3:** Security System Life Cycle Support - Services providing for design, coding, integration, testing, deploying, repair and maintenance of integrated security systems, and training across all platforms, enterprise wide, for the complete life cycle of the system.

## Instructions for Placing Orders for Services Based on GSA Schedule Hourly Rates

GSA provides a streamlined, efficient process for ordering the services you need. GSA has already determined that Johnson Controls meets the technical requirements and that our prices offered are fair and reasonable. Agencies may use written orders; facsimile orders, credit card orders, blanket purchase agreement orders or individual purchase orders under this contract. If it is determined that your agency needs an outside source to provide Schedule 03FAC Facilities Maintenance and Management services, follow these simple steps:

**Step 1. Develop a Statement of Work (SOW)** In the SOW, include the following information:

- Work to be performed,
- Location of work,
- Period of performance;
- Deliverable schedule, and
- Special standards and any special requirements, where applicable.

**Step 2. Select Contractor and Place Order**

- If the order is at or below the micro-purchase threshold, select the contractor best suited for your needs and place the order.
- If the order is exceeding but less than the maximum order threshold (MOT), prepare an RFQ;
- If the order is in excess of the MOT, prepare an RFQ. Consider expansion of competition and seek price reductions.

**Step 3. Prepare a Request for Quote (RFQ)**

- Include the SOW and evaluation criteria;
- Request fixed price, ceiling price, or, if not possible, labor hour or time and materials order;
- If preferred, request a performance plan from contractors and information on past experience; and include information on the basis for selection.
- May be posted on GSA's electronic RFQ system, e-Buy

**Step 4. Provide RFQ to at least Three Contractors**

**Step 5. Evaluate Offers, Select Best Value Contractor, and Place Order**

---

## Instructions for Placing Orders for Supplies Based on GSA Schedule Fixed Prices

GSA provides a streamlined, efficient process for ordering the supplies you need. GSA has already determined that Dedicated Micros, Inc.'s prices are fair and reasonable. Agencies may use written orders; facsimile orders, credit card orders, blanket purchase agreement orders or individual purchase orders under this contract.

### Orders under the Micro-Purchase Threshold

- You can place the order directly with the contractor for the item that best meets your needs.

### Orders over the Micro-Purchase Threshold

As required by FAR 8.404, you are required to:

- Review the *GSA Advantage!* online shopping service.
- Then make a Best Value determination.

OR

- Review 3 Schedule contractors' pricelists.
- Select Best Value (considering price, plus administrative costs).
- Place the order directly with Schedule contractor of your choice.

### Orders over the Maximum Order Threshold

- Follow the procedures for orders over the micro-purchase threshold.
- Review additional price lists or use the *GSA Advantage!* online shopping service.
- Seek price reductions from Schedule contractors that represent Best Value.
- Place your order with the Schedule contractor offering the Best Value.

---

## Blanket Purchase Agreements (BPAs)

This information will help ordering offices understand how to use Blanket Purchase Agreements (BPAs) under GSA Federal Supply Schedule contracts.

Blanket Purchase Agreements (BPAs) are a simplified method of filling anticipated repetitive needs for services and products. BPAs are "charge accounts" that ordering offices establish with GSA Schedule contractors to provide themselves with an easy ordering tool. In accordance with Federal Acquisition Regulation (FAR) 8.404, ordering offices may establish BPAs under any GSA Schedule contract.

### Benefits and Advantages of Using BPAs

Contractual terms and conditions are contained in GSA Schedule contracts and are not to be re-negotiated for GSA Federal Supply Schedule BPAs. Therefore, as a purchasing option, BPAs eliminate such contracting and open market costs as the search for sources, the need to prepare solicitations, and the requirement to synopsize the acquisition. BPAs also—

- Satisfy recurring requirements;
- Reduce acquisition costs through quantity discounts;
- Save time by eliminating repetitive, individual purchases and payments;
- Reduce administrative efforts and paperwork;
- Obtain better value by leveraging an ordering office's buying power through volume purchasing;
- Enable an ordering office to use streamlined ordering procedures with no dollar limitations on individual task/delivery orders;
- Permit an ordering office to incorporate Contractor Team Arrangements;
- Allow for quicker turnarounds on orders; and
- Permit an ordering office to incorporate terms and conditions not in conflict with the underlying contract.

A BPA can be set up for field offices across the nation to use, thus allowing them to participate in an ordering office's BPA and place orders directly with GSA Federal Supply Schedule contractors. In doing so, the entire agency reaps the benefits of additional discounts negotiated into the BPA. In addition, the ordering office reduces the administrative burden of writing numerous task/delivery orders, while still being able to order as much as it wants and as often as it wants. The flexibility and advantages are endless when setting up a BPA.

### Setting Up a BPA

BPAs are established directly with GSA Schedule contractors. In accordance with FAR 8.404, an ordering office may request a price reduction based on the total estimated volume of the BPA, regardless of the size of individual orders. The Request For Quotation (RFQ) should specify the ordering office's requirements, including estimated quantities and work to be performed, and should advise GSA Schedule contractors whether the ordering office intends to establish a single BPA or multiple BPAs.

Generally, a single BPA should be established when the ordering office can easily define its services and/or products requirements and a firm-fixed price or ceiling price can be established. Since a best value selection is made when the single BPA is established, the ordering office does not need to make a separate best value selection for each order under the BPA.

Multiple BPAs should be established when the ordering office cannot easily define its services and/or products requirements, or it determines that more than one BPA is needed to meet its needs. First determine which GSA Schedule contractors are technically qualified and then establish BPAs with them. When multiple BPAs are established, each order must be competed among all BPA holders and a best value selection must be made each time an order is placed.

**All BPAs must contain certain information, such as:**

- The name of the GSA Schedule contractor;
- The GSA Schedule contract number;
- The BPA number assigned by the ordering office;
- A description of the requirement, to include estimated quantities and work to be performed;
- The prices and/or discounts;
- The extent of the obligation;
- Any additional price reductions negotiated by the ordering office, based on the proposed dollar value of the BPA;
- A listing of individuals authorized to purchase under the BPA;
- The delivery or performance time frames;
- The location of deliveries;
- The frequency of ordering and invoicing;
- The date of BPA expiration; and
- A statement that all other terms and conditions are contained in the GSA Federal Supply Schedule contract.

**Note:** Prices under GSA Federal Supply Schedule contracts have already been determined to be fair and reasonable.

SAMPLE

BEST VALUE  
BLANKET PURCHASE AGREEMENT  
FEDERAL SUPPLY SCHEDULE  
(Insert Customer Name)

In the spirit of the Federal Acquisition Streamlining Act \_\_\_\_\_ (Agency) and **Johnson Controls, Inc.** enter into a cooperative blanket purchase agreement to further reduce the administrative costs of acquiring commercial items from the General Services Administration (GSA) Federal Supply Schedule Contract(s) **GS-07F-7823C**.

Federal Supply Schedule contract BPAs eliminate contracting and open market costs such as: the search for sources; the development of technical documents and solicitations; and the evaluation of bids and offers. Contractor Team Arrangements are permitted with Federal Supply Schedule contractors in accordance with Federal Acquisition Regulation (FAR) Subpart 9.6.

This BPA will further decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from the Schedule contract. The end result is to create a purchasing mechanism for the Government that works better and costs less.

(CUSTOMER NAME)

**BLANKET PURCHASE AGREEMENT**

Pursuant to GSA Federal Supply Schedule Contract Number(s) GS-07F-7823C, Blanket Purchase Agreements, **Johnson Controls, Inc.** agrees to the following terms of a Blanket Purchase Agreement (BPA) EXCLUSIVELY WITH (Ordering Agency) :

(1) The following contract services/products can be ordered under this BPA. All orders placed against this BPA are subject to the terms and conditions of the contract, except as noted below:

ITEM (Model/Part Number or Type of Service)

SPECIAL BPA DISCOUNT/PRICE

\_\_\_\_\_  
\_\_\_\_\_

(2) Delivery:

DESTINATION

DELIVERY SCHEDULE/DATES

\_\_\_\_\_  
\_\_\_\_\_

(3) The Government estimates, but does not guarantee, that the volume of purchases through this agreement will be \_\_\_\_\_.

(4) This BPA does not obligate any funds.

(5) This BPA expires on \_\_\_\_\_ or at the end of the contract period, whichever is earlier.

(6) The following office(s) is hereby authorized to place orders under this BPA:

OFFICER

POINT OF CONTACT

\_\_\_\_\_  
\_\_\_\_\_

(7) Orders will be placed against this BPA via Electronic Data Interchange (EDI), FAX, paper, or oral communications.

---

(8) Unless otherwise agreed to, all deliveries under this BPA must be accompanied by delivery tickets or sales slips that must contain the following information as a minimum:

- (a) Name of Contractor;
- (b) Contract Number;
- (c) BPA Number;
- (d) Model Number or National Stock Number (NSN);
- (e) Task/Delivery Order Number;
- (f) Date of Purchase;
- (g) Quantity, Unit Price, and Extension of Each Item (unit prices and extensions need not be shown when incompatible with the use of automated systems; provided, that the invoice is itemized to show the information); and
- (h) Date of Shipment.

(9) The requirements of a proper invoice are as specified in the Federal Supply Schedule contract. Invoices will be submitted to the address specified within the task/delivery order transmission issued against this BPA. (10) The terms and conditions included in this BPA apply to all purchases made pursuant to it. In the event of an Inconsistency between the provisions of this BPA and the Contractor's invoice, the provisions of this BPA will take precedence.

**\*IMPORTANT** -- A new feature to the Federal Supply Schedules Program permits contractors to offer price reductions in accordance with commercial practice. Contractor Team Arrangements are permitted with Federal Supply Schedule contractors in accordance with FAR Subpart 9.6.

## Johnson Controls YORK® Brand Equipment

Johnson Controls combined with YORK® heating, ventilation, air-conditioning, and refrigeration (HVAC&R) systems and solutions creates the largest global provider of integrated products, systems and services for the \$200 billion global building environment industry.

Johnson Controls/YORK® is a global leader in control systems for heating, ventilating, air conditioning (HVAC) for nonresidential buildings, facility management and consulting services. We are represented in over 125 countries, including North America, Asia, Europe, the Middle East, Africa and Latin America and in all markets.

Please contact the Johnson Controls GSA Contract Administrator for pricing information at:

### MaxE™ YK Centrifugal Chillers

MaxE™ YK centrifugal chillers provide the best route to real-world energy performance — the combined performance at all operating conditions, not just design. Because chillers in the real world operate nearly 99% of the time at off-design conditions, off-design performance is the major factor in energy consumption. That's why MaxE YK centrifugal chillers are engineered for maximum efficiency at both design and off-design conditions. All units are produced at an ISO 9001 registered facility. All MaxE™ YK centrifugal chillers are rated in accordance with ARI Standard 550/590 at ARI conditions.

The Air-conditioning, Heating, and Refrigeration Institute (AHRI) Chiller Certification Program endorses the validity of off-design analysis to compare chiller energy consumption. Measured with AHRI's Integrated Part Load Value (IPLV), MaxE YK centrifugal chillers are unsurpassed in energy efficiency. Equipped with an OptiSpeed™ variable-speed drive, they can reduce energy-usage ratios to new lows: 0.40, 0.30, and even 0.20 kW/TR at off-design conditions.

When a MaxE YK centrifugal chiller is equipped with an OptiSpeed drive, it incorporates advanced Adaptive Capacity Control logic, which continually optimizes chiller operation. It closely examines critical operating parameters, and then determines the most efficient way to operate. In addition, it lets you optimize your savings when using intelligent control strategies, such as chilled-water reset. Adaptive Capacity Control logic also accommodates the characteristics of the refrigerant used in the chiller — today and tomorrow.

### YCAL Air-Cooled Scroll Compressor Liquid Chillers

YORK® Air-Cooled Scroll Chillers provide chilled water for all air conditioning applications using central station air handling or terminal units. They are completely self-contained and are designed for outdoor (roof or ground level) installation. Each unit includes hermetic scroll compressors, a liquid cooler, air cooled condenser, a charge of refrigerant R-410A, and a weather resistant microprocessor control center, all mounted on a pressed-steel base. All units are produced at an ISO 9001 registered facility. YCAL chillers are rated in accordance with ARI Standard 550/590 at ARI conditions.

The unit is pressure-tested, evacuated, and fully charged with Refrigerant-410A and includes an initial oil charge. After assembly, a complete operational test is performed with water flowing through the cooler to assure that the refrigeration circuit operates correctly.

The unit structure is heavy-gauge, galvanized steel. This galvanized steel is coated with baked-on powder paint, which, when subjected to ASTM B117 1000 hour, salt spray testing, yields a minimum ASTM 1654 rating of “6”. Corrosion resistant wire mesh panels are added to protect the condenser coil from incidental damage and restrict unauthorized access to internal components. Unit also includes service isolation valves as standard. Units are designed in accordance with NFPA 70 (National Electric Code), ASHRAE/ANSI 15 Safety code for mechanical refrigeration, ASME, Listed and labeled with Intertek Testing Services (ETL) and rated in accordance with the latest version of ARI Standard 550/590.

### YLAA Air-Cooled Scroll Chillers

The YORK® YLAA air-cooled scroll chiller is an all-in-one package that is a true plug and play system that provides superb efficiency and performance. The chiller is completely self-contained and is designed for outdoor (roof or ground level) installation. An optional hydronic pump kit makes service replacement or new building installations very convenient. Each unit includes zero-ozone-depletion refrigerant (R-410A), hermetic scroll compressors, a liquid evaporator, air cooled condenser, and a weather resistant microprocessor control center, all mounted on a formed steel base. All units are produced at an ISO 9001 registered facility. YLAA chillers are rated in accordance with ARI Standard 550/590 at ARI conditions.

The unit is pressure-tested, evacuated, and fully charged with Ozone Depletion Potential Refrigerant R-410A and includes an initial oil charge. After assembly, a complete operational test is performed with water flowing through the evaporator to assure that the refrigeration circuit operates correctly.

The unit structure is heavy-gauge, galvanized steel. This galvanized steel is coated with baked-on powder paint, which, when subject to ASTM B117 1000 hour, salt, spray testing, yields a minimum ASTM 1654 rating of “6”. Units are designed in accordance with NFPA 70 (National Electric Code), ASHRAE/ANSI 15 Safety code for mechanical refrigeration, ASME and rated in accordance with ARI Standard 550/590.

With the combination of R-410A refrigerant and a 30%-50% reduction of refrigerant used vs. similar chillers, this chiller provides you with the most ecologically friendly equipment. Partnered with its low sound properties (for noise pollution prevention), this chiller is a true earth-friendly offering.

### Latitude™ Air-Cooled Chillers

Latitude™ chillers deliver all of the capital and installation advantages of traditional air-cooled screw chillers. And with their packaged, multi-circuit design and simple control, minimal on-site staff is required for maintenance and operation. All units are produced at an ISO 9001 registered facility. Latitude™ chillers are rated in accordance with ARI Standard 550/590 at ARI conditions.

What makes Latitude™ chillers unique is that they deliver real-world energy savings, which can reduce operating costs 15–25% when compared with other air-cooled screw chillers. Additionally, their sound levels at off-design conditions are so low that expensive sound-attenuation kits are often not required. Latitude chillers are the high performance, air-cooled screw chillers that deliver revolutionary advances in energy efficiency and sound levels, because, in all of today's buildings, performance matters.

Latitude chillers are designed to provide best-in-class, design efficiencies as high as 10.3 EER, which exceeds the building-energy standard of the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE), known as ASHRAE 90.1. You can count on getting this outstanding level of performance, because YORK® rates and tests Latitude chillers in accordance with the Air-conditioning and Refrigeration Institute's (ARI) Standard 550/590-98.

So, factor in the low operating costs and improved sound performance with the low installed costs and low maintenance costs, and you will see that Latitude chillers deliver the lowest total cost of ownership of any air-cooled chiller. You no longer have to sacrifice operating costs to achieve low first costs. Latitude™ chillers give you the freedom to have both.

### **YCWL Water-Cooled Scroll Liquid Chiller**

YORK® YCWL Water-Cooled chillers provide chilled water for all air conditioning applications that use central station air handling or terminal units. They are completely self-contained and are designed for indoor (new or retrofit) installation. Each unit includes hermetic scroll compressors, a liquid evaporator, water cooled condenser, and a user-friendly, Microcomputer Control Center mounted on a rugged steel base. All units are produced at an ISO 9001 registered facility. All YCWL chillers are rated in accordance with ARI Standard 550/590 at ARI conditions.

The unit will be pressure-tested, evacuated, and charged with Refrigerant-410A, and York® 'V' (POE) synthetic oil. There will be an operational test, with water flowing through the evaporator, to check that each control device operates correctly.

The unit structure is heavy-gauge, galvanized steel. This galvanized steel is coated with baked-on powder paint, which, when subjected to ASTM B117 1000 hour, salt spray testing, yields a minimum ASTM 1654 rating of "6". Corrosion resistant wire mesh panels are added to protect the condenser coil from incidental damage and restrict unauthorized access to internal components. Unit also includes service isolation valves as standard. Units are designed in accordance with NFPA 70 (National Electric Code), ASHRAE/ANSI 15 Safety code for mechanical refrigeration, ASME, Listed and labeled with Intertek Testing Services (ETL) and rated in accordance with the latest version of ARI Standard 550/590.

The chiller is engineered for maximum efficiency at both design and part-load operation by taking advantage of the colder cooling tower water temperatures which naturally occur during the winter months. Appreciable power savings are realized from these reduced heads.

### **YORK® Solution® Air-Handling Units**

YORK® Solution® air-handling units (AHUs) from Johnson Controls—the only names you need to know for a line that has no limits. Johnson Controls/YORK engineers have developed an AHU line that is so flexible, and able to deliver such high standards of performance, that it can handle virtually any application. Whatever the air-handling challenge—IAQ, acoustics, energy, controls, you name it—Johnson Controls/YORK® can build a Solution AHU that will meet your needs.

All units are produced at an ISO 9001 registered facility. YORK® Solution® air-handling units are rated in accordance with ARI Standard 550/590 at ARI conditions.

---

Solution® AHU's from Johnson Controls comprise a complete AHU line to meet commercial, institutional and industrial indoor and outdoor unit applications. For more than 50 years, YORK® air handling units have been installed in every type of facility to handle any type of requirement; manufacturing, education, healthcare, life sciences and process manufacturing.

Solution® AHU's come equipped with industry-leading Metasys® controls that are installed and commissioned at the factory. Factory installation assures superior quality, saves time on the jobsite and delivers accurate performance. Plus, you can count on seamless operation with a Metasys building management system.
