246-42-1	DS2400	The Dynasound DS2400 pipe, duct, and wall Soundmasker is used to protect pipes, ducts, and walls against human and electronic eavesdropping by filling them with full bandwidth soundmasking. The unit may be attached to the exterior of any pipe or duct, whether square or round. It may also be attached to the vertical surface of any partition wall. The DS2400 is critical to the securing of pipes and ducts when DIAM and DCID requirements for SCIF need to be met. The DS2400 Soundmasker may be used to ensure eavesdropping protection of pipes and ducts that breach the perimeter of a secure environment by resonating these penetrations, filling them with soundmasking and/or misinformation. Additionally, it resonates the plane of any wall along the perimeter of a secure environment. When controlled by Dynasound's DS102 Series security generators and amplifiers, it also protects against sophisticated signal recovery techniques.	US	\$204.59	\$201.08

246-42-1	DS2600	The Dynasound DS2600 Portable Eavesdropping Protection (PEP) Pack is a complete, compact, portable eavesdropping protection system designed for offsite or occasional applications. It offers the ability to quickly secure an environment against human and electronic eavesdropping, as well as advanced signal recovery techniques. The non-deterministic soundmasking signal can be layered with additional sources, such as music, nonsense syllables, and misinformation. This creates a complex signal that renders eavesdropping and signal recovery methods ineffective, providing an environment safe for sensitive information to be discussed. The system consists of a DS1092 soundmasking generator/mixer/amplifier, eight (8) soundmasking devices, standard RCA-type phono plug connector cables to daisy-chain the entire system, and a flight-approved, atmosphere compensating Pelican Protector Case™. The DS2600 PEP Pack is effective when DIAM and DCID requirements for SCIF need to be met in offsite or occasional applications. The PEP Pack's soundmasking devices are small and inconspicuous. The devices can be adhered directly onto a variety of surfaces utilizing a readily available peel-n-stick adhesive. They are easily removed, leaving no adhesive residue or evidence of their presence. They feature two standard phono jacks, which either jack can be used as the input or throughput.	US	\$4,603.28	\$4,524.27
