22. Environmental Attributes: Sustainability Interface feels a tremendous obligation to the environment and has been challenged by its founder to lead the world in industrial ecology by becoming a sustainable corporation. The road map we are following on this journey includes 7 Fronts of Sustainability, a few of which include: eliminate waste, eliminate harmful emissions, use only renewable energy and create closed loop processes.

Also included in this journey is the incorporation of recycled content into our products. Many Interface carpet styles contain recycled content. Also, with the addition of GlasBac RE (recycled content vinyl backing), the total product recycled content can be increased to the low to mid 50% range with a minimum of 20% post consumer recycled content.

Interface has a great deal of information available on its environmental efforts and journey to sustainability. For more details, contact Interface Sales Support, 800-336-0225 ext. 6511.

You may also visit our website: <http://www.interfacesustainability.com/>

23. Environmental Attributes: ISO 14001 and ISO 9001 InterfaceFLOR is currently registered to two international standards for quality and environmental concerns. ISO 9001 is a quality management system model that IFS received registration to on May 3, 2002.

ISO 14001 is an environmental management system model and since environmental stewardship is at the core of IFS' philosophy, the company pursued and received registration to this standard first, on June 18, 2001. IFS uses internationally recognized Underwriters Laboratories Inc. as its registrar.

In addition to these two international standards, InterfaceFLOR has recently received notification from the Environmental Protection Agency that its application for membership in the EPA's National Environmental Performance Track program has been accepted. This program is "designed to recognize and encourage top environmental performers - those who go beyond compliance with regulatory requirements to attain levels of environmental performance and management that benefit people, communities and the environment."

Performance Track closely mirrors ISO 14001 wherein it requires a company to comply with established environmental management requirements within its entry criteria. There are four basic areas that a company must comply:

- A company must have adopted and implemented an environmental management system (EMS) that includes the elements specified in the Performance Track Entry Criteria;
- Is able to demonstrate specific environmental performances and commit to continued improvement;
- Commits to public outreach and performance reporting; and
- Has a record of sustained compliance with environmental requirements.

For questions or further information on **ISO 9001** and **ISO 14001**, please contact Phyllis Woodson, ISO Coordinator, at 800-336-0225 ext. 6396.

Additional products are available from InterfaceFLOR under contract GS-27F-0002A. Please call 800-472-4771 for more information.
