Pricelist current through Modification # PS-0085, dated 08-23-21..

Mass Mod PS-A834- accepted
Other than Small Business

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!, a menu-driven database system. The Internet address GSA Advantage! is: GSAAvantage.gov.

For more information on ordering from Federal Supply Schedules click on the FSS Schedules button at fss.gsa.gov.

SPECIAL ITEM NUMBER 511210- Software License

SubSIN Categoric(s):

FSC/PSC Class 7030 ADP SOFTWARE

- **Ancillary Financial Systems Software**
- **Application Software • Communications Software**
- **Core Financial Mangement Software**
- **Electronic Commerce (EC) Software**
- **Large Scale Computers**
- **Microcomputers**
- **Operating System Software**
- **Special Physical, Visual, Speech, and Hearing Aid Software. Provide specific information.**
- **Utility Software**

SPECIAL ITEM NUMBER 54151 Software Maintenance Services

SubSIN Categoric(s):

**FSC/PSC Class J070 MAINT/REPAIR/REBUILD OF EQUIPMENT- ADP
EQUIPMENT/SOFTWARE/SUPPLIES/SUPPORT EQUIPMENT • Maintenance of Software**

SPECIAL ITEM NUMBER 518210C Cloud and Cloud-Related IT Professional Services

SubSIN Categoric(s):

**FSC/PSC Class D305 IT AND TELECOM- TELEPROCESSING, TIMESHARE, AND CLOUD
COMPUTING • Cloud Computing Services**

SPECIAL ITEM NUMBER 54151S- INFORMATION TECHNOLOGY PROFESSIONAL SERVICES

SubSIN Categoric(s):

**FSC/PSC Class D399 IT AND TELECOM- OTHER IT AND TELECOMMUNICATIONS • Other
Information Technology Services, Not Elsewhere Classified**

CUSTOMER INFORMATION:

1. Awarded Special Item Number(s):

SIN	Description
511210	Software License
54151	Software Maintenance Services
518210C	Cloud and Cloud-Related IT Professional Services
54151S	IT Professional Services

- 1b. Identification of the lowest priced labor category description, job title # and hourly rate awarded under the contract is: **See Price list**
2. **Maximum Order:** \$500,000 per SIN – For SINs 511210,54151,518210C, 54151S
3. **Minimum Order:** \$100
4. **Geographic Scope of Coverage:** The Geographic Scope of Coverage is Domestic Delivery. This is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. Domestic delivery also includes a port or consolidation point, within the aforementioned areas, for orders received from overseas activities.
5. **Points of Production:** USA
6. **Discount from list prices or statement of net price:** See Price list
7. **Quantity Discount:** SAP only SIN 511210, 54151 (30.25%>/equal to \$650,000 to \$1,000,000 orders
Virtual Forge SIN 511210 (+10% >/= \$150K - \$375K orders
(+15% > \$375K = 750K orders)
(+25%> \$751K-\$1.5M orders)
(+35%> \$1.5M-\$3M orders)
(+45%> \$3M+ orders)
8. **Prompt Payment Terms:** Net 30 Days
9. **A. Notification that Government purchase cards are accepted at or below the micro-purchase threshold:** Government Purchase Cards will be accepted however no additional discounts will apply under the contract.

B. Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold: Government Purchase Cards will be accepted however no additional discounts will apply under the contract.
10. **Foreign Items:** No foreign items are awarded under this contract.
11. **Normal Delivery Terms – 30 DARO**
- 11b. **Expedited Delivery Terms:** Contact Contractor
- 11c. **Overnight/2-Day Delivery Terms:** Contact Contractor
- 11d. **Urgent Requirements:** When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering activity, ordering activities are encouraged, if

time permits, to contact the Contractor for the purpose of obtaining accelerated delivery. The Contractor shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies shall be confirmed by the Contractor in writing.) If the Contractor offers an accelerated delivery time acceptable to the ordering activity, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

12. FOB Point: Destination

13. Ordering Address: Advantaged Solutions, Inc
1300 Pennsylvania Ave NW Ste 700
Washington, DC 20004

14. Payment Address: Advantaged Solutions, Inc
1300 Pennsylvania Ave NW Ste 700
Washington, DC 20004

15. Warranty/Guarantee Provisions: All services performed under this contract will be guaranteed to completed in a satisfactory workmanlike manner as delineated with this Authorized FSS IT Schedule Pricelist.

16. Export Packing Charges: Export Packing is not offered under this contract.

17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level): Accepted

18. Terms and conditions of rental, maintenance, and repair (if applicable): Not applicable

19. Terms and conditions of installation (if applicable): Not Applicable

20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not applicable

a) **Terms and conditions for any other services (if applicable):** Not applicable

- 21. List of service and distribution points (if applicable):** Not applicable
- 22. List of Participating dealers (if applicable):** Not applicable
- 23. Preventive maintenance (if applicable):** Not applicable
- 24. Special attributes such as environmental attributes (e.g. recycled content, energy efficiency, and/or reduced pollutants):** Not applicable
 - b. If applicable, indicate that Section 508 compliance information is available on Electronic and information Technology (EIT) supplies and services and show where full details can be found(e.g. contractor’s website or other location) The EIT standards can be found at www.Section508.gov/. :** Not applicable

- 25. Data Universal Numbering System (DUNS) Number:** 190169610

- 26. Advantaged Solutions, Inc** is currently registered within the System for Award Management (SAM) database.

TERMS AND CONDITIONS APPLICABLE TO SOFTWARE LICENSES (SPECIAL ITEM NUMBER 511210) AND MAINTENANCE AS A SERVICE (SPECIAL ITEM NUMBER 54151) OF GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY SOFTWARE

1. INSPECTION/ACCEPTANCE

The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The ordering activity reserves the right to inspect or test any software that has been tendered for acceptance. The ordering activity may require repair or replacement of nonconforming software at no increase in contract price. The ordering activity must exercise its post acceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the software, unless the change is due to the defect in the software.

2. ENTERPRISE USER LICENSE AGREEMENTS REQUIREMENTS (EULA)

The Contractor shall provide all Enterprise User License Agreements in an editable Microsoft Office (Word) format.

3. GUARANTEE/WARRANTY

a. Unless specified otherwise in this contract, the Contractor's standard commercial guarantee/warranty as stated in the contract's commercial pricelist will apply to this contract. See SCW.

b. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract. If no implied warranties are given, an express warranty of at least 60 days must be given in accordance with FAR 12.404(b)(2)

c. Limitation of Liability. Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the ordering activity for consequential damages resulting from any defect or deficiencies in accepted items.

4. TECHNICAL SERVICES

The Contractor, without additional charge to the ordering activity, shall provide a hot line technical support number ____ for the purpose of providing user assistance and guidance in the implementation of the software. The technical support number is available from _____ to _____.

5. SOFTWARE MAINTENANCE

a. Software maintenance as it is defined: (select software maintenance type) :

(1) _____ Software Maintenance as a Product (SIN 511210)

Software maintenance as a product includes the publishing of bug/defect fixes via patches and updates/upgrades in function and technology to maintain the operability and usability of the software product. It may also include other no charge support that is included in the purchase price of the product in the commercial marketplace. No charge support includes items such as user blogs, discussion forums, on-line help libraries and FAQs (Frequently Asked Questions), hosted chat rooms, and limited telephone, email and/or web-based general technical support for user's self-diagnostics.

Software maintenance as a product does NOT include the creation, design, implementation, integration, etc. of a software package. These examples are considered software maintenance as a service.

Software Maintenance as a product is billed at the time of purchase.

(2) _____ Software Maintenance as a Service (SIN 54151)

Software maintenance as a service creates, designs, implements, and/or integrates customized changes to software that solve one or more problems and is not included with the price of the software. Software maintenance as a service includes person-to-person communications regardless of the medium used to communicate: telephone support, on-line technical support, customized support, and/or technical expertise which are charged commercially. Software maintenance as a service is billed in arrears in accordance with 31 U.S.C. 3324.

Software maintenance as a service is billed in arrears in accordance with 31 U.S.C. 3324.

b. Invoices for maintenance service shall be submitted by the Contractor on a quarterly or monthly basis, after the completion of such period. Maintenance charges must be paid in arrears (31 U.S.C. 3324). PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE.

6. PERIODS OF MAINTENANCE (SIN 54151)

a. The Contractor shall honor orders for periods for the duration of the contract period or a lesser period of time.

b. Term licenses and/or maintenance may be discontinued by the ordering activity on thirty (30) calendar days written notice to the Contractor.

c. Annual Funding. When annually appropriated funds are cited on an order for term licenses and/or maintenance, the period of the term licenses and/or maintenance shall automatically expire on September 30 of the contract period, or at the end of the contract period, whichever occurs first. Renewal of the term licenses and/or maintenance orders citing the new appropriation shall be required, if the term licenses and/or maintenance is to be continued during any remainder of the contract period.

d. Cross-Year Funding Within Contract Period. Where an ordering activity's specific appropriation authority provides for funds in excess of a 12 month (fiscal year) period, the ordering activity may place an order under this schedule contract for a period up to the expiration of the contract period, notwithstanding the intervening fiscal years.

e. Ordering activities should notify the Contractor in writing thirty (30) calendar days prior to the expiration of an order, if the term licenses and/or maintenance is to be terminated at that time. Orders for the continuation of term licenses and/or maintenance will be required if the term licenses and/or maintenance is to be continued during the subsequent period. **The phrase, "Term Licenses and/or Maintenance" in the preceding paragraphs may need to be revised in order to be consistent with the Offeror's proposal; e.g., if only software maintenance is offered, all references to "term licenses" should be deleted from the preceding paragraphs.**

7. CONVERSION FROM TERM LICENSE TO PERPETUAL LICENSE

a. The ordering activity may convert term licenses to perpetual licenses for any or all software at any time following acceptance of software. At the request of the ordering activity the Contractor shall furnish, within ten (10) calendar days, for each software product that is contemplated for conversion, the total amount of conversion credits which have accrued while the software was on a term license and the date of the last update or enhancement.

b. Conversion credits which are provided shall, within the limits specified, continue to accrue from one contract period to the next, provided the software remains on a term license within the ordering activity.

c. The term license for each software product shall be discontinued on the day immediately preceding the effective date of conversion from a term license to a perpetual license.

d. The price the ordering activity shall pay will be the perpetual license price that prevailed at the time such software was initially ordered under a term license, or the perpetual license price prevailing at the time of conversion from a term license to a perpetual license, whichever is the less, minus an amount equal to % of all term license payments during the period that the software was under a term license within the ordering activity.

8. TERM LICENSE CESSATION

a. After a software product has been on a continuous term license for a period of * months, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the ordering activity. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the ordering activity. However, should the term license of the software be discontinued before the specified period of

the continuous term license has been satisfied, the perpetual license accrual shall be forfeited. **Each separately priced software product shall be individually enumerated, if different accrual periods apply for the purpose of perpetual license attainment.**

b. The Contractor agrees to provide updates and maintenance service for the software after a perpetual license has accrued, at the prices and terms of Special Item Number 132-34, if the licensee elects to order such services. Title to the software shall remain with the Contractor.

9. UTILIZATION LIMITATIONS - (SIN 511210, AND SIN 54151)

a. Software acquisition is limited to commercial computer software defined in FAR Part 2.101.

b. When acquired by the ordering activity, commercial computer software and related documentation so legend shall be subject to the following:

(1) Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.

(2) Software licenses are by site and by ordering activity. An ordering activity is defined as a cabinet level or independent ordering activity. The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.

(3) Except as is provided in paragraph 8.b(2) above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.

(4) The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of Disaster Recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.

(5) "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.

10. SOFTWARE CONVERSIONS - (SIN 511210)

Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as the result of a change in operating system, or from one computer system to another. Under a perpetual license (132-33), the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version. Under a term license (132-32), conversion credits which accrued while the earlier version was under a term license shall carry forward and remain available as conversion credits which may be applied towards the perpetual license price of the new version.

11. DESCRIPTIONS AND EQUIPMENT COMPATIBILITY

The Contractor shall include, in the schedule pricelist, a complete description of each software product and a list of equipment on which the software can be used. Also, included shall be a brief, introductory explanation of the modules and documentation which are offered.

12. RIGHT-TO-COPY PRICING

The Contractor shall insert the discounted pricing for right-to-copy licenses.

TERMS AND CONDITIONS APPLICABLE TO PURCHASE OF CLOUD COMPUTING PRODUCTS AND CLOUD RELATED IT PROFESSIONAL SERVICES (SPECIAL ITEM NUMBER 518210C)

******NOTE:** This SIN presents a solution for Contractors to provide cloud computing services and cloud-related IT professional services that comply with NIST definitions and principles within the scope of today’s technology and standards with a secondary goal of accommodating ongoing technical advances in cloud computing. SIN 518210C Cloud Computing Services and Cloud-Related IT Professional Services is designed to cover core Cloud Services including Infrastructure as a Service, Platform as a Service, and Software as a Service, as well as the Cloud-related IT Professional Services required to assess, prepare, refactor, migrate, DevOps, integrate or govern a Cloud implementation. In accordance with section 889 of the National Defense Authorization Act for Fiscal Year 2019 (Pub. L. 115-232, August 13, 2018), an executive agency will be prohibited one year after enactment of the

TERMS AND CONDITIONS APPLICABLE TO PURCHASE OF CLOUD COMPUTING PRODUCTS AND CLOUD RELATED IT PROFESSIONAL SERVICES (SPECIAL ITEM NUMBER 518210C)

Act from procuring, obtaining, extending or renewing a contract to procure or obtain any equipment, system or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system; and two years after enactment of the Act from entering into, renewing or extending a contract with an entity that uses covered telecommunications equipment or service in that entity’s equipment, system or service, as a substantial or essential component of any system, or as critical technology as part of any system. Section 889 defines “covered telecommunications equipment or services” as any of the following:

- (A) Telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities).
- (B) For the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities).
- (C) Telecommunications or video surveillance services provided by such entities or using such equipment.
- (D) Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of the National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country (i.e. the People’s Republic of China). (Pub. L. 115-232, section 889(f)(3), italicized parenthetical added).

1. SCOPE The prices, terms and conditions stated under Special Item Number (SIN) 518210C Cloud Computing Services (i.e. IaaS, etc.) and Cloud-Related Professional Services apply exclusively to Cloud Computing Services (i.e. IaaS, etc.) and Cloud-Related Professional Services within the scope of this Information Technology Schedule.

This SIN provides ordering activities with access to Cloud (i.e. SaaS, etc.) technical services that run in cloud environments and meet the NIST Definition of Cloud Computing Essential Characteristics. Cloud Services [(i.e. SaaS, etc.)] relating to or impinging on cloud that do not meet all NIST essential characteristics should be listed in other SINs. (For example: Software subscription services or Software as a Service offerings that do not meet the essential “measured service” requirement may meet the definition of “Term Licenses” under SIN 132-32. See the Measured Service requirement in Table 2, below.)

The scope of this SIN is limited to cloud capabilities provided entirely as a “pay as you go” service and cloud-related IT professional services. Hardware, software and other artifacts acquired to supporting the physical construction of a private or other cloud are out of scope for this SIN. Currently, an Ordering Activity can procure the hardware and software needed to build private on premise cloud functionality, through combining different services on other IT

Schedule FSS SINs (e.g., 54151S).

Sub-categories in scope for this SIN are the three NIST Service Models: Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS). Offerors may optionally select a single sub-category that best fits a proposed cloud service offering. Only one sub-category may be selected per each proposed cloud service offering. Offerors may elect to submit multiple cloud service offerings, each with its own single sub-category. The selection of one of three sub-categories does not prevent Offerors from competing for orders under the other two sub-categories. See service model guidance for advice on sub-category selection. Sub-category selection within this SIN is optional for any individual cloud service offering, and new cloud computing service (i.e. IaaS, etc.) technologies that do not align with the aforementioned three sub-categories may be included without a sub-category selection so long as they comply with the essential characteristics of cloud computing as outlined by NIST. See Table 1 for a representation of the scope and sub-categories.

Table 1: Cloud Computing Services (i.e. IaaS, etc.)

SIN Description Sub-Categories
 1 • Commercially available cloud computing services • Meets the National Institute for Standards and Technology (NIST) definition of Cloud Computing essential characteristics • Open to all deployment models (private, public, community or hybrid), vendors specify deployment models
 1. Software as a Service (SaaS): Consumer uses provider’s applications on cloud infrastructure. Does not manage/control platform or infrastructure. Limited application level configuration may be available.
 2. Platform as a Service (PaaS): Consumer deploys applications onto cloud platform service using provider-supplied tools. Has control over deployed applications and some limited platform configuration but does not manage the platform or infrastructure.
 3. Infrastructure as a Service (IaaS): Consumer provisions computing resources. Has control over OS, storage, platform, deployed applications and some limited infrastructure configuration, but does not manage the infrastructure.

1 Offerors may optionally select the single sub-category that best fits each cloud service offering, per Service Model Guidance, or select no sub-category if the offering does not fit an existing NIST service model.

2. DESCRIPTION OF CLOUD COMPUTING SERVICES (i.e. IaaS, etc.) AND PRICING **NOTE TO CONTRACTORS: The information provided below is designed to assist Contractors in qualifying cloud computing services for this SIN and providing complete descriptions and pricing information. This language should NOT be printed as part of the Information Technology Schedule Pricelist; instead, Contractors should respond to each service requirement as it relates to each cloud computing service offered under the contract. There is guidance provided in subsequent sections of the Terms and Conditions to assist in determining how to meet these requirements. This section delineates requirements for submitting a proposal for the Cloud Services (i.e. IaaS, etc.) SIN, as well as requirements that apply to Task Orders**
 a. Service Description Requirements for Listing Contractors
 The description requirements below are in addition to the overall Schedule 70 evaluation criteria described in SCP-FSS-001-N Instructions Applicable to New Offerors (Alternate I – MAR 2016) or SCP-FSS-001-S Instructions Applicable to Successful FSS Program Contractors, as applicable, SCP-FSS-004 and other relevant publications. Refer to overall Schedule 70 requirements for timelines related to description and other schedule updates, including but not limited to clauses 552.238-81 – section E and clause I-FSS-600. Table 2 summarizes the additional Contractor-provided description requirements for services proposed under the Cloud Computing Services (i.e IaaS, etc.). All mandatory description requirements must be complete, and adequate according to evaluation criteria. In addition there is one “Optional” reporting descriptions which exists to provide convenient service selection by relevant criteria. Where provided, optional description requirements must be complete and adequate according to evaluation criteria:

(1) The NIST Service Model provides sub-categories for the Cloud SIN and is strongly encouraged, but not required. The Service Model based sub-categories provide this SIN with a structure to assist ordering activities in locating and comparing services of interest. Contractors may optionally select the single service model most closely corresponding to the specific service offering. (2) If a sub-category is selected it will be evaluated with respect to the NIST Service Model definitions and guidelines in “Guidance for Contractors”.

Table 2: Cloud Service Description Requirements

Description Requirement Reporting Type Instructions
 1 Provide a brief written description of how the proposed cloud computing services
 Mandatory The cloud service must be capable of satisfying each of the five NIST essential Characteristics as outlined in NIST Special Publication 800-145. See ‘GUIDANCE FOR CONTRACTORS: NIST

(i.e. IaaS, etc.) satisfies each individual essential NIST Characteristic

Essential Characteristics' below in this document for detailed overall direction, as well as guidance on inheriting essential characteristics. The NIST "Measured Service" characteristic requires a minimal "pay as you go" unit of measurement appropriate for the service. In the case of SaaS, the appropriate maximum measured increment of service shall be no more than 30 days per user, or some other equivalent discrete measurement that provides the government with the advantage of frequent (approximately every 30 days) "pay as you go" metering cycles. SaaS products, where consumption is only measured on an annual basis, may better fit under "Term Software License" SIN 132-32. Likewise, offers of any combinations of IaaS, PaaS or any other cloud product services in a bundle or other fashion that do not meet the frequency requirements of approximately 30-day measurement and billing cycles, will not be accepted as complying with the NIST Measured Service characteristic.

2 Select NIST deployment models for the cloud computing service proposed.

Mandatory Contractors must select at least one NIST deployment model as outlined in NIST Special Publication 800-145 describing how the proposed cloud computing service is deployed. Select multiple deployment models if the service is offered in more than one deployment model. See 'GUIDANCE FOR CONTRACTORS: NIST Deployment Model' below in this document for detailed direction on how to best categorize a service for the NIST deployment models.

3 Optionally select the most appropriate NIST service model that will be the designated sub- category, or may select no sub- category.

Optional Contractor may select a single NIST Service model to subcategorize the service as outlined in NIST Special Publication 800-145. Sub-category selection is optional but recommended. See 'GUIDANCE FOR CONTRACTORS: NIST Service Model' below in this document for detailed direction on how to best categorize a service for the NIST IaaS, PaaS, and SaaS service models.

b. Pricing of Cloud Computing Services All current pricing requirements for Schedule 70, including provision SCP-FSS-001-N (Section III Price Proposal), SCP-FSS-001-S, SCP-FSS-004 (Section III Price Proposal), and clause I-FSS-600 Contract Price Lists, apply. At the current time there is no

provision for reducing or eliminating standard price list posting requirements to accommodate rapid cloud price fluctuations. In addition to standard pricing requirements, all pricing models must have the core capability to meet the NIST Essential Cloud Characteristics, particularly with respect to on-demand self-service, while allowing alternate variations at the task order level at agency discretion, pursuant to the guidance on NIST Essential Characteristics. **3. RESPONSIBILITIES OF THE CONTRACTOR** The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. **a. Acceptance Testing** Any required Acceptance Test Plans and Procedures shall be negotiated by the Ordering Activity at task order level. The Contractor shall perform acceptance testing of the systems for Ordering Activity approval in accordance with the approved test procedures. **b. Training** If training is provided commercially the Contractor shall provide normal commercial installation, operation, maintenance, and engineering interface training on the system. Contractor is responsible for indicating if there are separate training charges.

c. Information Assurance/Security Requirements The contractor shall meet information assurance/security requirements in accordance with the Ordering Activity requirements at the Task Order level. **d. Related Professional Services** The Contractor is responsible for working with the Ordering Activity to identify related professional services and any other services available on other SINs that may be associated with deploying a complete cloud service (i.e. IaaS, etc.) solution. Any additional substantial and ongoing IT professional services related to the offering such as assessing, preparing, refactoring, migrating, DevOps, developing new cloud based applications and managing/governing a cloud implementation may be offered per the guidelines below. **e. Performance of Cloud Computing Services (i.e. IaaS, etc.)** The Contractor shall respond to Ordering Activity requirements at the Task Order level with proposed capabilities to Ordering Activity performance specifications or indicate that only standard specifications are offered. In all cases the Contractor shall clearly indicate standard service levels, performance and scale capabilities. The Contractor shall provide appropriate cloud computing services (i.e. IaaS, etc.) on the date and to the extent and scope agreed to by the Contractor and the Ordering Activity. **f. Reporting**

The Contractor shall respond to Ordering Activity requirements and specify general reporting capabilities available for the Ordering Activity to verify performance, cost and availability. In accordance with commercial practices, the Contractor may

furnish the Ordering Activity/user with a monthly summary Ordering Activity report. **4. RESPONSIBILITIES OF THE ORDERING ACTIVITY** The Ordering Activity is responsible for indicating the cloud computing services requirements unique to the Ordering Activity. Additional requirements should not contradict existing SIN or IT Schedule 70 Terms and Conditions. Ordering Activities should include (as applicable) Terms & Conditions to address Pricing, Security, Data Ownership, Geographic Restrictions, Privacy, SLAs, etc. Cloud services typically operate under a shared responsibility model, with some responsibilities assigned to the Cloud Service Provider (CSP), some assigned to the Ordering Activity, and others shared between the two. The distribution of responsibilities will vary between providers and across service models. Ordering activities should engage with CSPs to fully understand and evaluate the shared responsibility model proposed. Federal Risk and Authorization Management Program (FedRAMP) documentation will be helpful regarding the security aspects of shared responsibilities, but operational aspects may require additional discussion with the provider. **a. Ordering Activity Information Assurance/Security Requirements Guidance** (1) The Ordering Activity is responsible for ensuring to the maximum extent practicable that each requirement issued is in compliance with the Federal Information Security Management Act (FISMA) as applicable. (2) The Ordering Activity shall assign a required impact level for confidentiality, integrity and availability (CIA) prior to issuing the initial statement of work.² The Contractor must be capable of meeting at least the minimum security requirements assigned against a low-impact information system in each CIA assessment area (per FIPS 200) and must detail the FISMA capabilities of the system in each of CIA assessment area. (3) Agency level FISMA certification, accreditation, and evaluation activities are the responsibility of the Ordering Activity. The Ordering Activity reserves the right to independently evaluate, audit, and verify the FISMA compliance for any proposed or awarded Cloud Computing Services. (4) The Ordering Activity has final responsibility for assessing the FedRAMP status of the service, complying with and making a risk-based decision to grant an Authorization to Operate (ATO) for the cloud computing service, and continuous monitoring. A memorandum issued by the Office of Management and Budget (OMB) on Dec 8, 2011 outlines the responsibilities of Executive departments and agencies in the context of FedRAMP compliance. **3**

2. Per Federal Information Processing Standards Publication 199 & 200 (FIPS 199, “Standards for Security Categorization of Federal Information and Information Systems”) (FIPS 200, “Minimum Security Requirements for Federal Information and Information Systems”) 3. MEMORANDUM FOR CHIEF INFORMATION OFFICERS: Security Authorization of Information Systems in Cloud Computing Environments. December 8, 2011.

(5) Ordering activities are responsible for determining any additional information assurance and security related requirements based on the nature of the application and relevant mandates. b. Deployment Model If a particular deployment model (Private, Public, Community, or Hybrid) is desired, Ordering Activities are responsible for identifying the desired model(s). Alternately, Ordering Activities could identify requirements and assess Contractor responses to determine the most appropriate deployment model(s). **c. Delivery Schedule** The Ordering Activity shall specify the delivery schedule as part of the initial requirement. The Delivery Schedule options are found in Information for Ordering Activities Applicable to All Special Item Numbers. **d. Interoperability** Ordering Activities are responsible for identifying interoperability requirements. Ordering Activities should clearly delineate requirements for API implementation and standards conformance. **e. Performance of Cloud Computing Services** The Ordering Activity should clearly indicate any custom minimum service levels, performance and scale requirements as part of the initial requirement. **f. Reporting** The Ordering Activity should clearly indicate any cost, performance or availability reporting as part of the initial requirement. **g. Privacy** The Ordering Activity should specify the privacy characteristics of their service and engage with the Contractor to determine if the cloud service is capable of meeting Ordering Activity requirements. For example, a requirement could be requiring assurance that the service is capable of safeguarding Personally Identifiable Information (PII), in accordance with NIST SP 800-1224 and OMB memos M-06-165 and M-07-166. An Ordering Activity will determine what data elements constitute PII according to OMB Policy, NIST Guidance and Ordering Activity policy. **4. NIST SP 800-122, “Guide to Protecting the Confidentiality of Personally Identifiable Information (PII)” 5. OMB memo M-06-16: Protection of Sensitive Agency Information**
<http://www.whitehouse.gov/sites/default/files/omb/memoranda/fy2006/m0616.pdf> **6. OMB Memo M-07-16: Safeguarding Against and Responding to the Breach of Personally Identifiable Information**
<http://www.whitehouse.gov/sites/default/files/omb/memoranda/fy2007/m07-16.pdf>

h. Accessibility The Ordering Activity should specify the accessibility characteristics of their service and engage with the Contractor to determine the cloud service is capable of meeting Ordering Activity requirements. For example, a requirement could require assurance that the service is capable of providing accessibility based on Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d).

i. Geographic Requirements Ordering activities are responsible for specifying any geographic requirements and engaging with the Contractor to determine that the cloud services offered have the capabilities to meet geographic requirements for all anticipated task orders. Common geographic concerns could include whether service data, processes and related artifacts can be confined on request to the United States and its territories, or the continental United States (CONUS).

j. Data Ownership and Retrieval and Intellectual Property Intellectual property rights are not typically transferred in a cloud model. In general, CSPs retain ownership of the Intellectual Property (IP) underlying their services and the customer retains ownership of its intellectual property. The CSP gives the customer a license to use the cloud services (i.e. IaaS, etc.) for the duration of the contract without transferring rights. The government retains ownership of the IP and data they bring to the customized use of the service as spelled out in the FAR and related materials. General considerations of data ownership and retrieval are covered under the terms of Schedule 70 and the FAR and other laws, ordinances, and regulations (Federal, State, City, or otherwise). Because of considerations arising from cloud shared responsibility models, ordering activities should engage with the Contractor to develop more cloudspecific understandings of the boundaries between data owned by the government and that owned by the cloud service provider, and the specific terms of data retrieval. In all cases, the Ordering Activity should enter into an agreement with a clear and enforceable understanding of the boundaries between government and cloud service provider data, and the form, format and mode of delivery for each kind of data belonging to the government. The Ordering Activity should expect that the Contractor shall transfer data to the government at the government's request at any time, and in all cases when the service or order is terminated for any reason, by means, in formats and within a scope clearly understood at the initiation of the service. Example cases that might require clarification include status and mode of delivery for:

- Configuration information created by the government and affecting the government's use of the cloud provider's service.
- Virtual machine configurations created by the government but operating on the cloud provider's service.

Profile, configuration and other metadata used to configure SaaS application services or PaaS platform services.

The key is to determine in advance the ownership of classes of data and the means by which Government owned data can be returned to the Government.

k. Service Location Distribution The Ordering Activity should determine requirements for continuity of operations and performance and engage with the Contractor to ensure that cloud services have adequate service location distribution to meet anticipated requirements. Typical concerns include ensuring that: (1) Physical locations underlying the cloud are numerous enough to provide continuity of operations and geographically separate enough to avoid an anticipated single point of failure within the scope of anticipated emergency events. (2) Service endpoints for the cloud are able to meet anticipated performance requirements in terms of geographic proximity to service requestors. Note that cloud providers may address concerns in the form of minimum distance between service locations, general regions where service locations are available, etc.

5. GUIDANCE FOR CONTRACTORS This section offers guidance for interpreting the Contractor Description Requirements in Table 2, including the NIST essential cloud characteristics, service models and deployment models. This section is not a list of requirements. Contractor-specific definitions of cloud computing characteristics and models or significant variances from the NIST essential characteristics or models are discouraged and will not be considered in the scope of this SIN or accepted in response to Factors for Evaluation. The only applicable cloud characteristics, service model/subcategories and deployment models for this SIN will be drawn from the NIST 800-145 special publication. Services qualifying for listing as cloud computing services (i.e. IaaS, etc.) under this SIN must substantially satisfy the essential characteristics of cloud computing as documented in the NIST Definition of Cloud Computing SP 800-1457. Contractors must select deployment models corresponding to each way the service can be deployed. Multiple deployment model designations for a single cloud service are permitted but at least one deployment model must be selected. In addition, contractors submitting Cloud services (i.e. IaaS, etc.) for listing under this SIN are encouraged to select a sub-category for each Cloud service (i.e. IaaS, etc.) proposed under this SIN with respect to a single principal NIST cloud service model that most aptly characterizes the service. Cloud Service model (i.e. IaaS, etc.) categorization is optional. ⁷ <http://csrc.nist.gov/publications/nistpubs/800-145/SP800-145.pdf>

Both Cloud service model (i.e. IaaS, etc.) and deployment model (i.e. public, etc.) designations must accord with NIST definitions. Guidance is offered in this document on making the most appropriate selection

a. NIST Essential Characteristics

NIST's essential cloud characteristics provide a consistent metric for whether a service is eligible for inclusion in this SIN. It is understood that due to legislative, funding and other constraints that government entities cannot always leverage a cloud service to the extent that all NIST essential characteristics are commercially available. For the purposes of the Cloud SIN, meeting the NIST essential characteristics is determined by whether each essential capability of the commercial service is available for the service, whether or not the Ordering Activity actually requests or implements the capability. The guidance in Table 3 offers examples of how services might or might not be included based on the essential characteristics, and how the Contractor should interpret the characteristics in light of current government contracting processes.

Table 3: Guidance on Meeting NIST Essential Characteristics

Characteristic Capability Guidance

On-demand self-service

• Ordering activities can directly provision services without requiring Contractor intervention. • This characteristic is typically implemented via a service console or programming interface for provisioning

Government procurement guidance varies on how to implement on-demand provisioning at this time. Ordering activities may approach ondemand in a variety of ways, including “not-to-exceed” limits, or imposing monthly or other appropriate payment cycles on what are essentially on demand services. Services under this SIN must be capable of true on- demand self-service, and ordering activities and Contractors must negotiate how they implement on demand capabilities in practice at the task order level: • Ordering activities must specify their procurement approach and requirements for on-demand service • Contractors must propose how they intend to meet the approach • Contractors must certify that on-demand self-service is technically available for their service should procurement guidance become available.

Broad Network Access

• Ordering activities are able to access services over standard agency
• Broad network access must be available without significant qualification and in relation to the deployment model and security domain of the

General Guidance

networks • Service can be accessed and provisioned using standard devices such as browsers, tablets and mobile phones
service • Contractors must specify any ancillary activities, services or equipment required to access cloud services or integrate cloud with other cloud or non- cloud networks and services. For example, a private cloud might require an Ordering Activity to purchase or provide a dedicated router, etc. which is acceptable but should be indicated by the Contractor.

Resource Pooling

• Pooling distinguishes cloud services from simple offsite hosting. • Ordering activities draw resources from a common pool maintained by the Contractor • Resources may have general characteristics such as regional location
• The cloud service must draw from a pool of resources and provide an automated means for the Ordering Activity to dynamically allocate them. • Manual allocation, e.g. manual operations at a physical server farm where Contractor staff configure servers in response to Ordering Activity requests, does not meet this requirement • Similar concerns apply to software and platform models; automated provisioning from a pool is required • Ordering activities may request dedicated physical hardware, software or platform resources to access a private cloud deployment service. However the provisioned cloud resources must be drawn from a common pool and automatically allocated on request.

Rapid Elasticity

• Rapid provisioning and deprovisioning commensurate with demand
• Rapid elasticity is a specific demand-driven case of self-service • ‘Rapid’ should be understood as measured in minutes and hours, not days or weeks. • Elastic capabilities by manual request, e.g. via a console operation or programming interface call, are required. • Automated elasticity which is driven dynamically by system load, etc. is optional. Contractors must specify whether automated demand-driven elasticity is available and the general mechanisms that drive the capability.

Measured Service

- Measured service should be understood as a reporting requirement that enables an Ordering Activity to control their use in cooperation with self service
- Procurement guidance for on-demand selfservice applies to measured service as well, i.e. rapid elasticity must be technically available but ordering activities and Contractors may mutually designate other contractual arrangements.
- Regardless of specific contractual arrangements, reporting must indicate actual usage, be continuously available to the Ordering Activity, and provide meaningful metrics appropriate to

the service measured

- Contractors must specify that measured service is available and the general sort of metrics and mechanisms available
- The goal of the Measured Service requirement is to ensure Ordering Activities realize the full benefit of “pay as you go” consumption models. Consumption measurements that are not discrete enough or frequent enough (greater than 30 days), will not fulfill this NIST essential characteristic and will not be eligible for inclusion in this SIN.

Cloud Services (i.e. IaaS, etc.) may depend on other cloud services, and cloud service models such as PaaS and SaaS are able to inherit essential characteristics from other cloud services that support them. For example a PaaS platform service can inherit the broad network access made available by the IaaS service it runs on, and in such a situation would be fully compliant with the broad network access essential characteristic. Cloud Services (i.e. IaaS, etc.) inheriting essential characteristics must make the inherited characteristic fully available at their level of delivery to claim the relevant characteristic by inheritance. Inheriting characteristics does not require the inheriting provider to directly bundle or integrate the inherited service, but it does require a reasonable measure of support and identification. For example, the Ordering Activity may acquire an IaaS service from “Provider A” and a PaaS service from “Provider B”. The PaaS service may inherit broad network access from “Provider A” but must identify and support the inherited service as an acceptable IaaS provider.

Typically broad network access for public deployment models implies high bandwidth access from the public internet for authorized users. In a private cloud deployment internet access might be considered broad access, as might be access through a dedicated shared high bandwidth network connection from the Ordering Activity, in accord with the private nature of the deployment model.

All cloud resource pools are finite, and only give the appearance of infinite resources when sufficiently large, as is sometimes the case with a public cloud. The resource pool supporting a private cloud is typically smaller with more visible limits. A finite pool of resources purchased as a private cloud service qualifies as resource pooling so long as the resources within the pool can be dynamically allocated to the ultimate users of the

Inheriting Essential Characteristics

Assessing Broad Network Access

Resource Pooling and Private Cloud

resource, even though the pool itself appears finite to the Ordering Activity that procures access to the pool as a source of dynamic service allocation.

b. NIST Service Model The Contractor may optionally document the service model of cloud computing (e.g. IaaS, PaaS, SaaS, or a combination thereof, that most closely describes their offering, using the definitions in The NIST Definition of Cloud Computing SP 800-145. The following guidance is offered for the proper selection of service models. NIST’s service models provide this SIN with a set of consistent sub-categories to assist ordering activities in locating and comparing Cloud services (i.e. IaaS, etc.) of interest. Service model is primarily concerned with the nature of the service offered and the staff and activities most likely to interact with the service. Contractors should select a single service model most closely

corresponding to their proposed service based on the guidance below. It is understood that cloud services can technically incorporate multiple service models and the intent is to provide the single best categorization of the service. Contractors should take care to select the NIST service model most closely corresponding to each service offered. Contractors should not invent, proliferate or select multiple cloud service model sub-categories to distinguish their offerings, because ad-hoc categorization prevents consumers from comparing similar offerings. Instead vendors should make full use of the existing NIST categories to the fullest extent possible. For example, in this SIN an offering commercially marketed by a Contractor as “Storage as a Service” would be properly characterized as Infrastructure as a Service (IaaS), storage being a subset of infrastructure. Services commercially marketed as “LAMP as a Service” or “Database as a Service” would be properly characterized under this SIN as Platform as a Service (PaaS), as they deliver two kinds of platform services. Services commercially marketed as “Travel Facilitation as a Service” or “Email as a Service” would be properly characterized as species of Software as a Service (SaaS) for this SIN. However, Contractors can and should include appropriate descriptions (include commercial marketing terms) of the service in the full descriptions of the service’s capabilities. When choosing between equally plausible service model sub-categories, Contractors should consider several factors: (1) Visibility to the Ordering Activity. Service model sub-categories in this SIN exist to help Ordering Activities match their requirements with service characteristics. Contractors should select the most intuitive and appropriate service model from the point of view of an Ordering Activity. (2) Primary Focus of the Cloud Service (i.e. IaaS, etc.). Services may offer a mix of capabilities that span service models in the strict technical sense. For example, a service may offer both IaaS capabilities for processing and storage, along with some PaaS capabilities for application deployment, or SaaS capabilities for specific applications. In a service mix situation the Contractor should select the service model that is their primary focus. Alternatively contractors may choose to submit multiple service offerings for the SIN, each optionally and separately subcategorized.

(3) Ordering Activity Role. Contractors should consider the operational role of the Ordering Activity’s primary actual consumer or operator of the service. For example services most often consumed by system managers are likely to fit best as IaaS; services most often consumed by application deployers or developers as PaaS, and services most often consumed by business users as SaaS. (4) Lowest Level of Configurability. Contractors can consider IaaS, PaaS and SaaS as an ascending hierarchy of complexity, and select the model with the lowest level of available Ordering Activity interaction. As an example, virtual machines are an IaaS service often bundled with a range of operating systems, which are PaaS services. The Ordering Activity usually has access to configure the lower level IaaS service, and the overall service should be considered IaaS. In cases where the Ordering Activity cannot configure the speed, memory, network configuration, or any other aspect of the IaaS component, consider categorizing as a PaaS service. Cloud management and cloud broker services should be categorized based on their own characteristics and not those of the other cloud services that are their targets. Management and broker services typically fit the SaaS service model, regardless of whether the services they manage are SaaS, PaaS or IaaS. Use Table 3 to determine which service model is appropriate for the cloud management or cloud broker services, or, alternately choose not to select a service model for the service. The guidance in Table 4 offers examples of how services might be properly mapped to NIST service models and how a Contractor should interpret the service model subcategories.

Table 4: Guidance on Mapping to NIST Service Models

Service Model Guidance

Infrastructure as a Service (IaaS)

Select an IaaS model for service based equivalents of hardware appliances such as virtual machines, storage devices, routers and other physical devices. • IaaS services are typically consumed by system or device managers who would configure physical hardware in a non-cloud setting • The principal customer interaction with an IaaS service is provisioning then configuration, equivalent to procuring and then configuring a physical device. Examples of IaaS services include virtual machines, object storage, disk block storage, network routers and firewalls, software defined networks. Gray areas include services that emulate or act as dedicated appliances and are directly used by applications, such as search appliances, security appliances, etc. To the extent that these services or their emulated devices provide direct capability to an application they might be better classified as Platform services (PaaS). To the extent that they resemble raw hardware and are consumed by other platform services they are better classified as IaaS.

Platform as a Service (PaaS)

Select a PaaS model for service based equivalents of complete or partial software platforms. For the purposes of this classification, consider a platform as a set of software services capable of deploying all or part of an application. • A complete platform can deploy an entire application. Complete

platforms can be proprietary or open source • Partial platforms can deploy a component of an application which combined with other components make up the entire deployment • PaaS services are typically consumed by application deployment staff whose

responsibility is to take a completed agency application and cause it to run on the designated complete or partial platform service • The principal customer interaction with a PaaS service is deployment, equivalent to deploying an application or portion of an application on a software platform service. • A limited range of configuration options for the platform service may be available. Examples of complete PaaS services include: • A Linux/Apache/MySQL/PHP (LAMP) platform ready to deploy a customer PHP application, • a Windows .Net platform ready to deploy a .Net application, • A custom complete platform ready to develop and deploy an customer application in a proprietary language • A multiple capability platform ready to deploy an arbitrary customer application on a range of underlying software services. The essential characteristic of a complete PaaS is defined by the customer’s ability to deploy a complete custom application directly on the platform. PaaS includes partial services as well as complete platform services. Illustrative examples of individual platform enablers or components include: • A database service ready to deploy a customer’s tables, views and procedures, • A queuing service ready to deploy a customer’s message definitions • A security service ready to deploy a customer’s constraints and target applications for continuous monitoring The essential characteristic of an individual PaaS component is the customer’s ability to deploy their unique structures and/or data onto the component for a partial platform function. Note that both the partial and complete PaaS examples all have two things in common: • They are software services, which offer significant core functionality out of the box • They must be configured with customer data and structures to deliver results As noted in IaaS, operating systems represent a gray area in that OS is definitely a platform service, but is typically bundled with IaaS infrastructure. If your service provides an OS but allows for interaction with infrastructure, please sub-categorize it as IaaS. If your service “hides” underlying infrastructure, consider it as PaaS.

Software as a Service (SaaS)

Select a SaaS model for service based equivalents of software applications. • SaaS services are typically consumed by business or subject-matter staff who would interact directly with the application in a non-cloud

setting • The principal customer interaction with a SaaS service is actual operation and consumption of the application services the SaaS service provides. Some minor configuration may be available, but the scope of the configuration is limited to the scope and then the permissions of the configuring user. For example an agency manager might be able to configure some aspects of the application for their agency but not all agencies. An agency user might be able to configure some aspects for themselves but not everyone in their agency. Typically only the Contractor would be permitted to configure aspects of the software for all users. Examples of SaaS services include email systems, business systems of all sorts such as travel systems, inventory systems, etc., wiki’s, websites or content management systems, management applications that allow a customer to manage other cloud or non-cloud services, and in general any system where customers interact directly for a business purpose. Gray areas include services that customers use to configure other cloud services, such as cloud management software, cloud brokers, etc. In general these sorts of systems should be considered SaaS, per guidance in this document.

c. **Deployment Model** Deployment models (e.g. private, public, community, or hybrid) are not restricted at the SIN level and any specifications for a deployment model are the responsibility of the Ordering Activity. Multiple deployment model selection is permitted, but at least one model must be selected. The guidance in Table 4 offers examples of how services might be properly mapped to NIST deployment models and how the Contractor should interpret the deployment model characteristics.

Contractors should take care to select the range of NIST deployment models most closely corresponding to each service offered. Note that the scope of this SIN does not include hardware or software components used to construct a cloud, only cloud capabilities delivered as a service, as noted in the Scope section.

Table 5: Guidance for Selecting a Deployment Model

Deployment Model Guidance Private Cloud The service is provided exclusively for the benefit of a definable organization and its components; access from outside the organization is prohibited. The actual services may be provided by third parties, and may be physically located as required, but access is strictly defined by membership in the owning organization.

Public Cloud The service is provided for general public use and can be accessed by any entity or organization willing to contract for it. **Community Cloud** The service is provided for the exclusive use of a community with a definable shared boundary such as a mission or interest. As with private cloud, the service may be in any suitable location and administered by a community member or a third party. **Hybrid Cloud** The service is composed of one or more of the other models. Typically hybrid models include some aspect of transition between the models that make them up, for example a private and public cloud might be designed as a hybrid cloud where events like increased load permit certain specified services in the private cloud to run in a public cloud for extra capacity, e.g. bursting.

6. INFORMATION PERTAINING TO CLOUD RELATED IT PROFESSIONAL SERVICES

NOTE: Offerors may offer Cloud Services (i.e. IaaS, etc.) exclusively; it is not a requirement to also offer Cloud Related IT Professional Services. Similarly, offerors of Cloud Related IT Professional Services are not required to also offer Cloud Services (i.e. IaaS, etc.). Offerors who have capabilities in both Cloud Services (i.e. IaaS, etc.) and Cloud Related IT Professional Services may offer both, under this SIN.

NOTE: **Labor categories under Special Item Number 54151S “Information Technology Professional Services may remain under SIN 54151S, unless they are specific to the Cloud Computing Products and IT Professional Services 518210C. Labor specific to Cloud Computing should be positioned by Contractors under SIN 518210C in order for Contractors to have the opportunity to bid on requests for quotes that are generated exclusively under the Cloud SIN. Offerors may offer Cloud IT Professional Services exclusively; it is not a requirement to also offer Cloud Services (i.e. IaaS).**

a. SCOPE OF 518210C Cloud Related IT Professional Services (1) The labor categories, prices, terms and conditions stated under Special Item Numbers 518210C Cloud Services and Related IT Professional Services apply exclusively to this SIN within the scope of this Information Technology Schedule. It is anticipated that the relevant IT Professional Services for this SIN (518210C) are related to the following: assessing cloud solutions, preparing for cloud solutions, refactoring legacy solutions for cloud migration, migrating legacy or other systems to cloud solutions, DevOps, developing new cloud based applications and providing management/governance for cloud solutions. Contractors may propose other types of relevant professional services as long as they are specifically designed to work within and/or support the types of cloud product services described in SIN 518210C. (2) Cloud Related IT Professional Services provided under this SIN shall comply with all certifications and industry standards as applicable pertaining to the type of services as specified by ordering agency.

(3) The Contractor shall provide Cloud Related IT Professional Services at the Contractor’s facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

b. ORDER (1) Agencies may use written orders, Electronic Data Interchange (EDI) orders, Blanket Purchase Agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The order shall specify the availability of funds and the period for which funds are available. (2) All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

c. PERFORMANCE OF SERVICES (1) The Contractor shall commence performance of Cloud Related IT Professional Services on the date agreed to by the Contractor and the ordering activity. (2) The Contractor agrees to render Cloud Related IT Professional Services during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity. (3) The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Cloud Related IT Professional Services shall be completed in a good and workmanlike manner. (4) Any Contractor travel required in the performance of Cloud Related IT Professional Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts. All travel will be agreed upon with the client prior to the Contractor’s travel.

d. INSPECTION OF SERVICES Inspection of services is in accordance with 552.212-4 CONTRACT TERMS AND CONDITIONS–COMMERCIAL ITEMS (JAN 2017) (DEVIATION – FEB 2007) (DEVIATION - FEB 2018) for Firm-Fixed Price orders; or GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS–COMMERCIAL ITEMS (JAN 2017) (DEVIATION - FEB 2018) (ALTERNATE I - JAN 2017) (DEVIATION - FEB 2007) for Time-and-Materials and LaborHour Contracts orders placed under this contract.

e. RESPONSIBILITIES OF THE CONTRACTOR The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then Critical Information Specific to Schedule # 70– Information Technology, Software & Services Solicitation FCIS-JB-980001B (Refresh # 52)

FAR 52.227-14 (MAY 2014) Rights in Data – General, may apply.

The Contractor shall comply with contract clause (52.204-21) to the Federal Acquisition Regulation (FAR) for the basic safeguarding of contractor information systems that process, store, or transmit Federal data received by the contract in performance of the contract. This includes contract documents and all information generated in the performance of the contract.

f. **RESPONSIBILITIES OF THE ORDERING ACTIVITY** Subject to the ordering activity's security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite Cloud Computing IT Professional Services.

g. **INDEPENDENT CONTRACTOR** All Cloud Computing IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

h. **ORGANIZATIONAL CONFLICTS OF INTEREST (1) Definitions.** "Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

i. **INVOICES** The Contractor, upon completion of the work ordered, shall submit invoices for Cloud Computing IT Professional Services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined

milestones or interim products. Invoices shall be submitted monthly for recurring IT professional services performed during the preceding month.

j. **PAYMENTS** The ordering activity shall pay the Contractor upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. Payments shall be made in accordance with:

For orders that are NOT time-and-materials/labor hours (fixed price applicable). • GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS—COMMERCIAL ITEMS (JAN 2017) (DEVIATION – FEB 2007) (DEVIATION - FEB 2018)

For orders that are time-and-materials/labor hours. • GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS—COMMERCIAL ITEMS (JAN 2017) (DEVIATION - FEB 2018) (ALTERNATE I - JAN 2017) (DEVIATION - FEB 2007)

• FAR 52.216-31 (Feb 2007) Time-and Materials/Labor-Hour Proposal Requirements— Commercial Item Acquisition. As prescribed in 16.601(f)(3), insert the following provision: (1) The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation. (2) The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by- i The offeror; ii Subcontractors; and/or iii Divisions, subsidiaries, or affiliates of the offeror under a common control.] k. **RESUMES** Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

l. **APPROVAL OF SUBCONTRACTS** The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

m. DESCRIPTION OF CLOUD COMPUTING LABOR HOURS AND PRICING (1) The Contractor shall provide a description of each type of Cloud Computing Professional Service offered under Special Item Numbers 518210C and it should be presented in the same manner as the Contractor sells to its commercial and other ordering activity customers. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles (labor categories) for those

individuals who will perform the service should be provided. (2) Pricing for all Cloud Computing IT Professional Services shall be in accordance with the Contractor's customary commercial practices; e.g., hourly rates,, minimum general experience and minimum education.

The following is an example of the manner in which the description of a commercial job title should be presented (see SCP FSS 004).

EXAMPLE Commercial Job Title: Senior Cloud Subject Matter Expert

Description: Provides highest-level cloud computing domain expertise to large scale and complex projects as a client resource. Leads teams and client interaction from workflow design to cloud solution deliverables.

Professionals involved in this specialty perform the following tasks: ▪ Provides in-depth knowledge and expertise from cloud computing and business domains ▪ Develops and improves technical and business requirements documentation and specifications ▪ Reviews client requirements during on-boarding and other project phases ▪ Presents alternatives to client based designs based on impact to cost, performance and outcomes ▪ Incorporates enterprise architecture designs from business unit services strategies ▪ Provides advisory services to the service provider, cross functional teams, and clients

Knowledge, Skills and Abilities: Documented track record of successful client engagements in large public sector enterprise environments. 10+ years experience with SOAP, JSON, J2EE, SML, REST, OAuth, SAML, and OpenID. 4+ years experience with AD, LDAP, ODBC, SSO, CAC/PIV, STS, SSL, IEP, 3DES, 2-Factor, and STIG. Proficient with SDLC, AWS, and Oracle. Ability to thrive in a dynamic public sector environment.

Minimum Experience: 10 Years

Minimum Education Requirements: an MS degree in computer science or equivalent.

Highly Desirable: Deep knowledge of Microsoft Azure and Amazon Web Services core service offerings

**TERMS AND CONDITIONS APPLICABLE TO INFORMATION TECHNOLOGY (IT) PROFESSIONAL SERVICES
(SPECIAL ITEM NUMBER 54151S)**

1. SCOPE

a. The prices, terms and conditions stated under Special Item Number 54151S Information Technology Professional Services apply exclusively to IT/IAM Professional Services within the scope of this Information Technology Schedule.

b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. PERFORMANCE INCENTIVES I-FSS-60 Performance Incentives (April 2000)

a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract

b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.

c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. ORDER

a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. PERFORMANCE OF SERVICES

a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.

d. Any Contractor travel required in the performance of IT/IAM Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)

a. The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

(1) Cancel the stop-work order; or

(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

b. If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and

(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

- c. If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.
- d. If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

In accordance with 552.212-4 CONTRACT TERMS AND CONDITIONS–COMMERCIAL ITEMS (JAN 2017) (DEVIATION – FEB 2007)(DEVIATION - FEB 2018) for Firm-Fixed Price orders; or GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS-COMMERCIAL ITEMS (JAN 2017) (DEVIATION - FEB 2018) (ALTERNATE I - JAN 2017) (DEVIATION - FEB 2007) for Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

7. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT/IAM Professional Services.

9. INDEPENDENT CONTRACTOR All IT/IAM

Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. ORGANIZATIONAL CONFLICTS OF INTEREST

a. Definitions. “Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for IT/IAM Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. PAYMENTS

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract.

52.216-31(Feb 2007) Time-and Materials/Labor-Hour Proposal Requirements— Commercial Item Acquisition. As prescribed in 16.601(e)(3), insert the following provision:

- a. The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.**
- b. The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by— (1) The offeror; (2) Subcontractors; and/or (3) Divisions, subsidiaries, or affiliates of the offeror under a common control.**

13. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. DESCRIPTION OF IT/IAM PROFESSIONAL SERVICES AND PRICING

- a. The Contractor shall provide a description of each type of IT/IAM Service offered under Special Item Numbers 54151S IT/IAM Professional Services should be presented in the same manner as the Contractor sells to its commercial and other ordering activity customers. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles (labor categories) for those individuals who will perform the service should be provided.**
- b. Pricing for all IT/IAM Professional Services shall be in accordance with the Contractor's customary commercial practices; e.g., hourly rates, monthly rates, term rates, and/or fixed prices, minimum general experience and minimum education.**
- c. The following is an example of the manner in which the description of a commercial job title should be presented: EXAMPLE: Commercial Job Title: System Engineer Minimum/General Experience: Three (3) years of technical experience which applies to systems analysis and design techniques for complex computer systems. Requires competence in all phases of systems analysis techniques, concepts and methods; also requires knowledge of available hardware, system software, input/output devices, structure and management practices. Functional Responsibility: Guides users in formulating requirements, advises alternative approaches, conducts feasibility studies.**

USA COMMITMENT TO PROMOTE SMALL BUSINESS PARTICIPATION PROCUREMENT PROGRAMS

PREAMBLE

Advantaged Solutions, Inc provides commercial products and services to ordering activities. We are committed to promoting participation of small, small disadvantaged and women-owned small businesses in our contracts. We pledge to provide opportunities to the small business community through reselling opportunities, mentor-protégé programs, joint ventures, teaming arrangements, and subcontracting.

COMMITMENT

To actively seek and partner with small businesses.

To identify, qualify, mentor and develop small, small disadvantaged and women-owned small businesses by purchasing from these businesses whenever practical.

To develop and promote company policy initiatives that demonstrate our support for awarding contracts and subcontracts to small business concerns.

To undertake significant efforts to determine the potential of small, small disadvantaged and women-owned small business to supply products and services to our company.

To insure procurement opportunities are designed to permit the maximum possible participation of small, small disadvantaged, and women-owned small businesses.

To attend business opportunity workshops, minority business enterprise seminars, trade fairs, procurement conferences, etc., to identify and increase small businesses with whom to partner.

To publicize in our marketing publications our interest in meeting small businesses that may be interested in subcontracting opportunities.

We signify our commitment to work in partnership with small, small disadvantaged and women-owned small businesses to promote and increase their participation in ordering activity contracts. To accelerate potential opportunities please contact

(CUSTOMER NAME)
BLANKET PURCHASE AGREEMENT

Pursuant to GSA Federal Supply Schedule Contract Number(s) _____, Blanket Purchase Agreements, the Contractor agrees to the following terms of a Blanket Purchase Agreement (BPA) EXCLUSIVELY WITH (ordering activity):

(1) The following contract items can be ordered under this BPA. All orders placed against this BPA are subject to the terms and conditions of the contract, except as noted below:

MODEL NUMBER/PART NUMBER	*SPECIAL BPA DISCOUNT/PRICE
_____	_____
_____	_____
_____	_____

(2) Delivery:

DESTINATION	DELIVERY SCHEDULES / DATES
_____	_____
_____	_____
_____	_____

(3) The ordering activity estimates, but does not guarantee, that the volume of purchases through this agreement will be _____.

(4) This BPA does not obligate any funds.

(5) This BPA expires on _____ or at the end of the contract period, whichever is earlier.

(6) The following office(s) is hereby authorized to place orders under this BPA:

OFFICE	POINT OF CONTACT
_____	_____
_____	_____
_____	_____

(7) Orders will be placed against this BPA via Electronic Data Interchange (EDI), FAX, or paper.

(8) Unless otherwise agreed to, all deliveries under this BPA must be accompanied by delivery tickets or sales slips that must contain the following information as a minimum:

- (a) Name of Contractor;
- (b) Contract Number;
- (c) BPA Number;
- (d) Model Number or National Stock Number (NSN);
- (e) Purchase Order Number;
- (f) Date of Purchase;

(g) Quantity, Unit Price, and Extension of Each Item (unit prices and extensions need not be shown when incompatible with the use of automated systems; provided, that the invoice is itemized to show the information); and

(h) Date of Shipment.

(9) The requirements of a proper invoice are specified in the Federal Supply Schedule contract. Invoices will be submitted to the address specified within the purchase order transmission issued against this BPA.

(10) The terms and conditions included in this BPA apply to all purchases made pursuant to it. In the event of an inconsistency between the provisions of this BPA and the Contractor's invoice, the provisions of this BPA will take precedence.

BASIC GUIDELINES FOR USING “CONTRACTOR TEAM ARRANGEMENTS”

Federal Supply Schedule Contractors may use “Contractor Team Arrangements” (see FAR 9.6) to provide solutions when responding to a ordering activity requirements.

These Team Arrangements can be included under a Blanket Purchase Agreement (BPA). BPAs are permitted under all Federal Supply Schedule contracts.

Orders under a Team Arrangement are subject to terms and conditions of the Federal Supply Schedule Contract.

Participation in a Team Arrangement is limited to Federal Supply Schedule Contractors.

Customers should refer to FAR 9.6 for specific details on Team Arrangements.

Here is a general outline on how it works:

- The customer identifies their requirements.
- Federal Supply Schedule Contractors may individually meet the customer's needs, or -
- Federal Supply Schedule Contractors may individually submit a Schedules “Team Solution” to meet the customer's requirement.
- Customers make a best value selection.

107	This product belongs to the SAP Custom Development Portfolio.
108	<u>Dir + CCP - This product is only available for Direct sales and via the Cloud Choice: Profit model. For more information regarding the Cloud Business Partner Model, please check www.sappartneredge.com.</u>
Licensing Details for SAP Business Suite Software	
201	Suppliers do not require a Named User License.
202	Business Partners do not require a Named User License.

Remark Code	Remark Description
203	Customers do not require a Named User License.
207	<p>BSI U.S. Payroll Tax Processing must be licensed in blocks of 1,000 Master Records, and must equal the number of SAP Payroll Processing Software Engine Master Records licensed by the Customer (or at a minimum, the number of SAP Payroll Processing Software Engine Master Records licensed by the Customer's Authorized Affiliate(s) using the BSI U.S. Payroll Tax Processing software.) BSI U.S. Payroll Tax Processing license fees identified above are not discountable. A volume discount is already built into the fees shown above.</p> <p>BSI has 3 maintenance offerings. 7000269 SAP US Payroll Tax Processing by BSI Standard Support is the BSI standard maintenance offering at 42% of BSI license revenue and required when licensing 7018532. 7016203 SAP US Payroll Tax Processing by BSI Premium Support is an additional BSI support offering provided at 23% of BSI license revenue. If selected, a customers total maintenance rate for BSI would be 65% (7000269 + 7016203) 7016204 SAP US Payroll Tax Processing by BSI Platinum Support is an additional BSI support offering provided at 33% of BSI license revenue. If selected, a customers total maintenance rate for BSI would be 75% (7000269 + 7016204) Please note: A customer cannot license both 7016203 and 7016204 at the same time.</p> <p>In addition, a \$500 fee is applicable for any change in platform as BSI needs to provide a new version of its software for each changed platform (with regard to the BSI Software, any change in the customer's database, operating system, etc. is considered a change in platform. The license and maintenance fees shown for the BSI U.S. Payroll Tax Processing software is for use at only one (1) location on a single platform. If multiple locations or platforms must be licensed, the above fees must be charged for each such location and platform. BSI U.S. Payroll Tax Processing is a local reselling item and can only be sold for usage in U.S.A. This item can only be sold via the direct sales channel. Local prices are to be derived by using foreign exchange market rates (USD to local currency). These rates are available from your local controlling department (transaction ZMCU in ISP). Please refer to the "M" rate (Exchange Rate of the Month).</p>
208	Appraisers do not require a Named User License.
209	An SAP Learning User license is sufficient.

Remark Code	Remark Description
210	SAP Health Care User license is sufficient in relation to the roles specified in the User definition
211	An SAP Industry Portfolio User is sufficient for internal or external use cases according to the current definition of the SAP Industry Portfolio User.
212	7010170 and if product is used in the context of SAP Transportation Management, in addition the license 7017352 is required
213	This products contains Visual Enterprise Generator which currently is only supported on MS-SQL. Customers who have not purchased the MS-SQL Database from SAP will need to purchase MS-SQL directly from the vendor.
214	An SAP Project User license is sufficient.
215	SAP S/4HANA Finance, central finance foundation requires the license of System Landscape Transformation. This is included in the license of SAP HANA Enterprise Edition, SAP HANA Runtime Edition for Applications and SAP HANA BW. In the event SAP S/4HANA Finance, central finance foundation is licensed with SAP HANA Platform Edition, the license of SLT Full Use is required.
Licensing Details for SAP NetWeaver Software	
301	Developer and administrators require a SAP Developer User license.
302	Includes Public Sector Records Management.
Licensing Details for SAP BusinessObjects Software	

Remark Code	Remark Description
504	<p>Edge BI licensed by users has a limit of 100 users per server. Edge BI licensed by CSBL has a limit of 50 CSBLs per server. In the Classic model, Edge BI licensed by CAL has a limit of 50 CALs per server.</p> <p>Edge BI users and CSBLs may be mixed up to their stated maximums. Crystal Server has a limit of 100 users plus 250 CSBLs per server. Edge Data Integrator, Edge Data Quality Management, Edge Data Services, and Edge Information Steward have a limit of 8 Cores per server.</p>
524	<p>Maximum 24 named users and single server; when licensee wants to exceed maximums indicated, upgrade to corresponding SAP BusinessObjects Analytic Solution is required (7010952, 7010953, 7010955,7010956, 7010957, 7010959, 7010958, 7010960)</p>
507	<p>Conditional licensing of Databases & SAV relevance: If the SAP BusinessObjects solution is deployed standalone, the required databases needs to be licensed directly from database vendors (note: Sybase ASE runtime may be licensed for standalone scenario). In case of integrated scenario, SAP BusinessObjects solution would be SAV relevant (per SAP solution SAV requirement).</p>
525	<p>Maximum 49 named users and single server; when licensee wants to exceed maximums indicated, upgrade to corresponding SAP BusinessObjects Analytic Solution is required (7010954, 7010961, 7010951, 7010950)</p>
509	<p>Edge Planning and Consolidation license limitation: Maximum deployment of single application server and not more than 70 named users. The deployment is limited to 1 production environment. An environment consists of one or more models where each model contains the master data that controls the data in the environment. Models can share one or more dimensions with other models within the environment.</p>
513	<p>SAP BusinessObjects FIM is to be licensed whenever data integration with third party (non-SAP) systems is required. Data integrator restricted license is included within FIM and is subject to conditions that are explicitly described in the Pricing & Licensing Principles.</p>

Remark Code	Remark Description
514	License limitations for SAP BusinessObjects Enterprise when used with SAP BusinessObjects EPM: (a) use of the Central Mgmt. Server for user authentication; use of Central Mgmt. Console to administer user rights/privileges specific to EPM.
526	Must be licensed via the same metric (NU or CSBL) as the prerequisite product (e.g., SAP BusinessObjects Web Intelligence consumption package may be licensed as CSBL only if SAP BusinessObjects Business Intelligence Platform package has been licensed as CSBL). The number of licenses (NU or CSBL) for this product cannot exceed the number of licenses for the prerequisite product of the same metric.
527	SAP BusinessObjects Intercompany license is included in this product.
Special provisions for Directory Subscriptions	
517	Prerequisite: perpetual license of SAP Data Quality or Data Services Products.
520	No annual maintenance fees charged.
521	Royal Mail User means an individual authorized by an End User to use a Solution.
522	eCommerce as used herein means a solution whereby the Licensee operates a publicly available website (or a technical equivalent) which offers products and services to its external customers and which can capture, verify, update or amend an address or postcode, entered by a Licensee external customer, using the licensed product.
524	A Server license entitles Licensee to use Netherlands Address Directory in up to 9 locations of Licensee. An Unlimited Server License entitles Licensee to use Netherlands Address Directories in up to 99 locations of Licensee. Affiliates of Licensee require a separate license and are not covered under a Server or Unlimited Server License. A Corporate License entitles Licensee and Licensee Affiliates to use Netherlands Address Directories.
Licensing Details for Sybase Products	

Remark Code	Remark Description
607	Conditional licensing of Databases & SAV relevance: If the Sybase solution is deployed standalone, the required databases needs to be licensed directly from database vendors.
615	Multi-Source Integrators by MITI for non-SAP data. Add-on to be sold separately. Cores count applies across all of productive installs of Data Services (DI, TDP, DQ), DQM-SAP Solutions, and Information Steward. (Cores count is not individual, per product). Need for additional Cores with same use rights purchase this material. Any previous EIM Runtime license rights within this scenario eliminated, replaced by DS for Full Use Cores. (ie: BI Analytics Editions, HANA or Financial Information Management)
619	The yearly fee for SAP SybaseSQL Anywhere Technical Repair Plan is capped at EUR 200,000
Additional Licensing Details for SAP and SAP BusinessObjects items	
702	If a customer buys and sells commodities (commodity converters) both packages (SAP Commodity Procurement, base package and SAP Commodity Sales, base package) need to be licensed. It is mandatory to license at least one of the 9 commodity group price list items (7011590-7011598).
703	<p>Administrative staff require named user licenses. Academic teaching staff, academic advisors, or students do not require named user licenses.</p> <p>Academic staff are employees whose principal duties are teaching and / or research, regardless of their administrative duties (e.g., recording attendance, assigning grades, viewing student records, etc.)</p>
710	Conditional licensing of Databases & SAV relevance: If the SAP Visual Enterprise solutions are deployed standalone, the required databases needs to be licensed directly from database vendors.
712	Can only be sold to customers who have written documentation from the USPS that that they have been authorized to purchase this data. Can only be used in support of mailing needs. It cannot be used to simply update internal customer list information.

Remark Code	Remark Description
714	The Use of SAP WBP does not require a Named User license in addition to the Package license in case of Standalone usage, as defined in the SAP Software Use Right document.
715	Pre = SAP HANA: Platform Edition, Enterprise Edition, Runtime Edition for Applications and SAP BW, Limited Runtime edition for Applications–HANA Apps only.
716	PRE=7017688, 7017877, 7017693, 7017879, 7017695, 7017880, 7017690, 7017878 + 7017596, 7017592
718	Named user licensing depends on deployment: (1) . Integrated: SAP Complex Manufacturing Execution interfaced with SAP Business Suite, licensing of SAP Named Users is required (2) Standalone: SAP Complex Manufacturing Execution will not interface with SAP Business Suite, no SAP Named Users are required
723	Pre = SAP HANA: Database Edition for BW, Platform Edition, Enterprise Edition, Limited runtime edition for applications
724	Pre = SAP HANA: Database Edition for BW, Spatial Edition, Platform Edition, Enterprise Edition
725	Pre=7017343, 7017344, 7017349
728	For HANA Limited Runtime Edition for Applications/HANA Runtime Edition for BW/HANA Limited Runtime Edition for Applications and SAP BW "Install base" material codes, the customer's entire applicable HSAV relevant net software value is taken into account. Once one of these "Install base" materials have been licensed for the customer's entire HSAV relevant net software value, an ongoing charge will be applied for any subsequent HSAV relevant Software licensed from SAP
731	The hybris products can use MySQL as the underlying database, but this database needs to be licensed from the database vendor directly and is not available through SAP
732	The SAP hybris Packages include the required SAP Named User licenses. This is also applicable for Business Partners.
733	This is a support offering, priced on an annual subscription basis. PRE=SAP HANA (any edition) or SAP Sybase IQ or SAP Sybase ASE (any edition) or SAP Data Services (any edition) or SAP BusinessObjects BI Platform/Suite (any edition) or SAP Sybase ESP or SAP Sybase RAP or SAP Lumira.
734	If the customer requires use of the embedded HANA App a license of HANA as listed in remark 715 is required.

Remark Code	Remark Description
735	Pre = HANA Platform, HANA Enterprise edition
737	The HANA Limited Runtime Edition for Applications/HANA Runtime Edition for BW/HANA Limited Runtime Edition for Applications and SAP BW fee will be discounted by the average deal discount of the current order form for internal calculation purposes only. The HANA Limited Runtime Edition fee is not further discountable after applying the average deal discount.
738	The prerequisite to run a B2B scenario with Solution Sales and Billing including CRM service management processes is the price list item 7017330 SAP CRM Service.
740	The runtime database fee of this product will be discounted by the average deal discount of the current order form for internal calculation purposes only. The runtime database fee is not further discountable after applying the average deal discount.
741	The customer's entire HSAV value for the licensed HANA related Application is taken into account. Once licensed, an ongoing charge will be applied for any subsequent HANA related Applications licensed from SAP
742	PRE= HANA: Enterprise Edition, Runtime Edition for Applications and SAP BW
743	Every user that utilises the the solution must also be licensed for S/4HANA Enterprise Management Package: Pre = 7018652 or 7018538.
744	Pre = HANA Service: Base Edition, Platform Edition
745	Every individual using this material must also be licensed to use <u>either</u> 7018538 and any associated Named User licenses, <u>or</u> one of following materials: 7018652, 7018653, 7018654
746	Customer must have deployed an instance of 8004788 - <i>SAP S/4HANA Enterprise Management Cloud, private option</i>
747	Customer must have deployed an instance of one of the following material codes: <i>8003472 - SAP S/4HANA, cloud professional services edition</i> <i>8004968 - SAP S/4HANA Enterprise Management Cloud</i> <i>8004824 - SAP S/4HANA Finance Cloud</i>
748	Pre = SAP HANA Enterprise Edition

Remark Code	Remark Description
749	Pre = SAP HANA, Runtime edition for SAP BW or SAP HANA, Runtime edition for Applications & SAP BW or SAP HANA, Runtime edition for Applications & SAP BW - Partial or SAP HANA, Platform Edition or SAP HANA, Enterprise Edition
List Price Calculation	
	<p>The following schema are used to calculating list prices:</p> <p><u>Linear Pricing</u> The total list price is calculated by multiplying the price per unit with the number of units purchased. E.g.; 7003013 - SAP Developer User.</p> <p><u>Tiered Pricing</u> The total list price is calculated by using the correct tier based on accumulated historic purchased volume and multiplying the tier's price with the purchased volume. E.g.; 7011534 - SAP HANA, Platform Edition, up to 10 units.</p> <p><u>Cumulative Pricing</u> Tiered pricing structure where you pay the applicable price per tier level for the accumulated historic volume amount. As you move up in tiers, your price will adjust accordingly. You must purchase the full tier level before moving to the next tier. E.g.; 7018261 - SAP hybris Billing.</p> <p><u>Base Price</u> A fixed price that is to be paid before sales units can be added. E.g.; 7011589 - SAP Commodity Sales: Base Package.</p>

Remark Code	Remark Description
900	<p><u>Linear Pricing:</u> <i>This is the default list price calculation for Price List items if none are specified</i> The total list price is calculated by multiplying the price per unit with the number of units purchased.</p> <p><u>Transaction Example:</u> 7003013 - SAP Developer User Volume: 25 Blocks Material List Price: 6.000€ Total List Price = (25 * 6.000€) = 150.000€</p>
901	<p><u>Tiered Pricing:</u> The total list price is calculated by using the correct tier based on accumulated historic purchased volume and multiplying the tier's per unit price with the purchased volume. Once the Volume limit for the tier is met, move to the subsequent tier.</p> <p><u>Transaction 1:</u> 8004441 - SAP Hybris Merchandising Volume: 13,000,000 Page Views Material List Price: 1.500€ Total List Price = (13 * 1.500€) = 19.500€</p>

Remark Code	Remark Description
902	<p><u>Cumulative Pricing:</u> Tiered pricing structure where you pay the applicable price per tier level for the accumulated historic volume amount. As you move up in tiers, your price will adjust accordingly. You must purchase the full tier level before moving to the next tier.</p> <p><u>Transaction 1:</u> 7018261 - SAP hybris Billing Volume: 5 Blocks Material List Price: 550.000€ Total List Price = (5 * 550.000€) = 2.750.000€</p> <p><u>Transaction 2:</u> Volume: 10 Blocks (15 Accumulated Blocks) Material List Price: 550.000€ & 440.000€ Total List Price = (5 * 550.000€) + (5 * 440.000) = 4.950.000€ <i>Explanation: We first need to license the remaining blocks in the initial tier before we can license at the following tier's price.</i></p>
903	<p><u>Base Price / Flat Fee:</u> A one-time, fixed price that is to be paid before sales units can be Licensed.</p> <p><u>Transaction Example:</u> 7011597 - SAP Commodity Sales & Procurement for silver Volume: 10 Blocks Material List Price: 10.000€ Total List Price = (10 * 10.000€) + 300.000€ = 400.000€ <i>Explanation: The Base Package for SAP Commodity Sales must be purchased before other materials can be licensed.</i></p>

Remark Code	Remark Description
904	<p><u>Base Price / Flat Fee with specific sales units included:</u>A one-time, fixed price that is to be paid before sales units can be licensed. This fixed price has a set number of sales numbers included within it's structure.<u>Transaction Example:8003962 - SAP Innovation Management, cloud edition (Includes 10 blocks)</u>Volume: 500 BlocksMaterial List Price: 35.00€Total List Price = ((500 - 10) * 35.00€) + 50.000€ = 67.150€<u>Explanation: The Base Package for SAP Innovation Management includes 10 users and is at a cost of 50.000€. The difference between the desired users and the included users is what will be billed.</u></p>
905	<p><u>Tier-Based Flat Fee:</u> The total list price is calculated by determining the tier based from blocks purchased and applying the appropriate flat fee for that tier.</p> <p><u>Transaction Example:</u> <i>8003334 - Ariba Supplier Enablement Membership</i> Volume: 475.000 Blocks Material List Price: 200.685€ Total List Price = 200.685€</p>
906	<p><u>Currency Based Volume Tiers:</u> The total list price is calculated from volume tiers that are based off a monetary range, instead of a block range.</p> <p><u>Transaction Example:</u> <i>8004527 - Ariba Advanced Supply Chain Automation</i> Spend Amount: \$2,550,000,000 Material Volume Tier: <i>From 2,000,000,001 to 4,000,000,000</i> Material List Price: 0.017% Total List Price = \$433,500</p>

Remark Code	Remark Description
907	<p><u>Non-Prorated Consumption Based Volume Tiers:</u> The total list price is calculated from volume tiers that are based off a set amount of the metric block. Once a customer utilises the total licensed quantity, they would be required to purchase more.</p> <p><u>Example: 8004475 - SAP SuccessFactors Recruiting Posting</u></p> <p><u>Transaction 1:</u> Job Postings: 2,800* Material Volume Tier: <i>From 2,501 to 5,000</i> Material List Price: 65.00€ Total List Price = 182,000€ *All 2,800 postings are consumed in 6 months.</p> <p><u>Transaction 2:</u> Job Postings: 2,800* Material Volume Tier: <i>From 2,501 to 5,000</i> Material List Price: 65.00€ Total List Price = 182,000€ The additional 2,800 postings are licensed aain for the remainder of the period</p>
