About Superb Internet Corporation

Superb Internet Corporation has more than 20 years of solid track record and experience (since 1996) operating multiple carrier-neutral data centers covering both coasts of the US and its coast-to-coast IP backbone. We provide a full range of colocation services, mission critical grade, 100% uptime IP transit, managed infrastructure services, cloud computing services (Infrastructure-as-a-Service), dedicated servers, shared hosting, domain registration, and a global content delivery network, thus improving the reliability, performance, security, and speed of our customers' Internet infrastructure.

Our enterprise & governmental colocation customers locate their equipment, running business-critical applications, in our highly compliant and rigorously audited data centers, and, optionally, connect to our 100% uptime, packet loss-free coast-to-coast IP backbone, which, thanks to our extensive global peering, reaches most Internet routes directly and completely transit free. Our wide range of cloud hosting customers buy cloud infrastructure (public, private of hybrid) in resource pools and allocate the said resources to any number and configuration of Virtual Machines as needed, being able to instantly deploy new VMs, and delete, copy, clone, back-up and modify existing VMs. Our large and global dedicated server customer base rents or lease-to-owns (and subsequently colocates) anywhere from one to several hundred servers per customer, using the dedicated hardware for a very wide scale of uses (content hosting, web hosting, Unified Communications / VoIP services, legal documents analysis, financial trading, running apps for SaaS (Software-as-a-Service) provisioning, private clouds, storage, various public services, and so on).

Our service stands apart from the rest in many areas, but the key differentiators include:

- The highest global standards of compliance and certification, truly unsurpassed in the US. We are not only SSAE-16 SOC-1 Type II audited, PCI-DSS, HIPPA , SOX, GLBA, FISMA and ITIL compliant, but we are also ISO 9001:2008 (Quality Management) and ISO 27001:2013 (Information Security Management) Certified & Registered with UKAS and ANAB under the stringent requirements from International Standards Organization. In short, our data centers, operations and network are designated and operated following the world's internationally recognized most stringent security, quality and compliance requirements.
- Our operations and data centers are continually audited by numerous independent third party auditors and registrar.
- Our data centers are built to a 100% uptime standard with multiple redundancies (N+1 or greater) throughout.
- All of our data centers are staffed by experienced systems administrators and network engineers 24x7x365. Whenever you call us, you will always speak to a technician directly on site.
- Our highly scalable coast-to-coast IP backbone enables us to control all aspects of the customer experience and reaches the majority of global Internet routes directly and completely transit free, due to our extensive global peering, thus delivering lower latency and higher transfer speed. In addition, our highly efficient network design allows for rapid provisioning and growth.
- Our IP backbone is designed and built with multiple levels of redundancy and fault tolerance throughout, and is designed to never be single location reliant in any major markets (where we also operate data centers), thus ensuring that in case of a major disaster even when most other networks are down, our customers data will keep flowing unimpeded.
- We not only promise 100% uptime, practically instant response time, zero packet loss and ultra- low latency in our SLA, we actually deliver it.
- We are a constant industry leader, staying true to our motto, "Ahead of the Rest"®. For example, we were the first provider worldwide to offer commercial VPS (Virtual Private Server) service, the predecessor of today's cloud services, back in 1999 – many years ahead of the rest. We were likewise the first provider, in 1997, to provide commercial name-based virtual hosting. Where we lead, others in the industry follow.
- Our cloud platform, based on the InfiniBand 40 Gb/s, and many 100s of times lower latency than 10 Gigabit Ethernet, networking technology (on a worldwide exclusive basis), provides local disk equivalent I/O performance, combined with the benefits of single-point-of-failure-free modern distributed storage, and with zero oversubscription on the public cloud – each and every customer is always guaranteed the resources that they purchaser: unequivocally, all the time. To this date not a single competitor is able to beat our CPU or RAM consistent performance (due to our lack of oversubscription), or our high our disk I/O performance, in any equivalent public cloud platform.

Superb Internet Corporation is a privately held company and has been and remains profitable and cash flow positive ever since its inception in 1996. It has no liabilities such as debts, outside investment, or equipment leases. Superb Internet Corporation is a fully self-sufficient, fiscally responsible and strong organization.

Security & Quality Management Systems
We strongly believe in a well-defined and consistently applied management system for all aspects of our operations, including robust controls and change management as part of a comprehensive Quality Management System (QMS), and, just as importantly, a thorough Information Security Management System (ISMS), covering all aspects of operations, both physical and digital, both day to day and disaster handling & recovery.

As such, all of our data centers and all of our operations throughout, are SSAE-16 SOC-1 Type II (formerly known as SAS-70 Type II) audited, without a single exception noted on the audit report. However, we do not just stop there. All of our data centers and operations are also ISO 27001:2013 (ISMS) and ISO 9001:2008 (QMS) Audited, Certified & Registered with UKAS and ANAB under the stringent requirements from International Standards Organization, thus giving every customer complete assurance that all of our processes and operations are following the world's toughest & highest standards when it comes to change management, controls, facility and service quality management, and, very importantly for a core Internet infrastructure deployment, information and facility security management.

All of our data centers are staffed 24x7x365 by skilled Systems and Network Administrators & Engineers. All locations are linked together through highly fault-tolerant global ticket and phone systems, which are built to withstand a major disaster and have no single point of failure within.

Service Level Agreement (SLA)
We are proud to offer an exceptional level of performance, reliability and service. We provide a detailed SLA guaranteeing our data center and network uptime, reliability and performance. A summary of the SLA terms follows.

Data Center Reliability & Performance:
- 100% electric supply (power) uptime (with redundant A & B power circuits)
  - one day credit for each hour of downtime
- 100% of time compliance with environmental (AC) specifications
  - one day credit for each day of non-compliance
- 5 minute response time to urgent (phone) support requests
  - one day credit for each unique case of non-compliance
- replacement of malfunctioning hardware within under two hours (for customers with Superb Internet Corporation managed hardware)
  - one day credit for each additional two hours taken

Network Reliability & Performance:
- 100% network uptime
  - one day credit for each hour of downtime
- No packet loss on our network
  - one day credit for each 1% of packet loss
- Below 3 ms latency on our network to our local area peers & Tier 1 backbone bandwidth providers
  - one day credit for each additional 3 ms of latency

Credit Terms:
- Up to 100% of applicable fees on customer's monthly bill may be credited due to failure to provide service per the terms of the SLA
- Measurement of all data is per a 30 consecutive day period
- No cost, no penalty immediate affected service termination is permitted if over any 30 consecutive day period data center electric supply (both A & B) or network downtime exceeds 1% (7 hours), or packet loss on our network exceeds 5%, or any guaranteed latency on our network exceeds the guaranteed levels by 20 ms, or there is a downtime of over 24 hours during customer's managed hardware repair (only one of these conditions has to be met)

<u>Controlled Group</u>
HopOne Internet Corporation (www.hopone.net) has more than 17 years (in business since 1999) of solid track record and experience operating a coast-to-coast IP backbone, hopone.net (AS 14361), and multiple data centers covering both coasts of the US. HopOne Internet Corporation provides a full range of colocation services and mission critical grade, 100% uptime IP transit. HopOne Internet is both our provider (of colocation and network infrastructure services and of our 24x7x365 technical support) and also a member of the same controlled group that we are a part of. We combine our two decades long experience in hosting (shared, dedicated, and cloud) with our associate/partner HopOne's data centers and coast-to-coast IP backbone in order to provide a complete and unified service set, ranging from core infrastructure services such as colocation and IP transit, through the historically most popular service, dedicated servers, and onto IaaS services such as cloud.

<u>No Dependence upon Third Parties</u>
We pride ourselves on our extensive experience and self sufficiency. We are not dependent on any third parties on any technical or other expertise. We have a talented technical staff base with a wide and comprehensive technical skill array, and with many 100s of years with the company combined experience.

All aspects of our operations (internal and customer facing) are run, and largely automated, using a comprehensive software suite, the result of several 100s of man years of development time and comprised of more than 6.5 million lines of original code. The code is 100% owned by us, ensuring that we are not tied to and not dependent on any third-party vendors for any aspects of our operations automation.

Our Offerings

Terms and Conditions

1. Scope

The prices, terms and conditions stated under Special Item Number 132-52 Electronic Commerce (EC) Services apply exclusively to EC Services within the scope of this Information Technology Schedule. The Terms of Service can be found at http://www.superb.net/about/legal/terms-of-service and apply to all Superb Internet provided services, while HopOne Colocation and IP Transit Agreements apply to HopOne provided services, and will be provided upon request.

2. Electronic Commerce Capacity and Coverage

The Ordering Activity shall specify the capacity and coverage required as part of the initial requirement.

3. Information Assurance

a. The Ordering Activity is responsible for ensuring to the maximum extent practicable that each requirement issued is in compliance with the Federal Information Security Management Act (FISMA)

b. The Ordering Activity shall assign an impact level (per Federal Information Processing Standards Publication 199 & 200 (FIPS 199, "Standards for Security Categorization of Federal Information and Information Systems") (FIPS 200, "Minimum Security Requirements for Federal Information and Information Systems") prior to issuing the initial statement of work. Evaluations shall consider the extent to which each proposed service accommodates the necessary security controls based upon the assigned impact level. The Contractor awarded SIN 132-52 is capable of meeting at least the minimum security requirements assigned against a low-impact information system (per FIPS 200).

c. The Ordering Activity reserves the right to independently evaluate, audit, and verify the FISMA compliance for any proposed or awarded Electronic Commerce services. All FISMA certification, accreditation, and evaluation activities are the responsibility of the ordering activity.

4. Delivery Schedule

The Ordering Activity shall specify the delivery schedule as part of the initial requirement. The Delivery Schedule options are found in Information for Ordering Activities Applicable to All Special Item Numbers, paragraph 6. Delivery Schedule.

5. Interoperability

When an Ordering Activity requires interoperability, this requirement shall be included as part of the initial requirement. Interfaces may be identified as interoperable on the basis of participation in a sponsored program acceptable to the Ordering Activity. Any such access or interoperability with teleports/gateways and provisioning of enterprise service access will be defined in the individual requirement.

6. Order

a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering electronic services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all electronic services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

7. Performance of Electronic Services

The Contractor shall provide electronic services on the date agreed to by the Contractor and the ordering activity.

8. Responsibilities of the Contractor

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character.

9. Rights in Data

The Contractor shall comply FAR 52.227-14 RIGHTS IN DATA – GENERAL and with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character.

10. Acceptance Testing

If requested by the ordering activity the Contractor shall provide acceptance test plans and procedures for ordering activity approval. The Contractor shall perform acceptance testing of the systems for ordering activity approval in accordance with the approved test procedures.

11. Warranty

Refer to Service Level Agreement (SLA).

12.   Management and Operations Pricing

The Contractor shall provide management and operations pricing on a uniform basis. All management and operations requirements for which pricing elements are not specified shall be provided as part of the basic service.

13.   Training

N/A

14.   Monthly Reports

In accordance with commercial practices, the Contractor may furnish the ordering activity/user with a monthly summary ordering activity report.

Warranty –Service Level Agreement

1. Service Level Description

We are proud of the consistently reliable nature of our data centers and network and the level of support we provide. We have established standards upon which we base our assessment of that reliability. These standards are set out in this Service Level Agreement (SLA), which is an Addendum to the Colocation Agreement and/or IP Transit Agreement. Depending on the services you purchase from us, in the unlikely event our Data Center Service and/or Network (as defined below) service level fails to meet these Standards, you may seek certain compensation as set out in this SLA. Terms that are not defined in this SLA shall have the meaning given to them in the Agreement governing your services.

2. Our Data Center Services

This SLA applies to our data centers, starting from the protected power systems (generators and UPS systems) and terminating at the dedicated customer power circuits provided off our PDUs (Power Distribution Units), and it covers all the HVAC systems and environmental conditions (namely, temperature and humidity) and all of our provided cross-connects within our data centers. In addition, for customers with our provided managed hardware, the SLA also applies to the hardware repair or replacement timeframes. This SLA does not apply to any customer equipment, such as in-rack power bars (in-rack "PDUs"), any servers, switches, firewalls, load balancers, routers (with the exception of our provided managed hardware), or any other customer equipment or customer cabling. For purposes of this SLA only, the term "Data Center" encompasses the description in this paragraph. A Colocation Agreement must be executed and be currently in force in order for this SLA Addendum to apply to the Data Center Services.

3. Our Network

This SLA applies to our internal, managed network core, distribution and access layers, as shown on our current network map. A current copy of our network map is available on our web site. This SLA does not apply to LEC/CLEC/telco circuits, fiber, upstream providers or any other portions of our network or Internet connectivity that are not under our complete control. The SLA also does not apply to any customer devices or any customer managed cables/connections. For purposes of this SLA only, the term "Network" encompasses the description in this paragraph. An IP Transit Agreement must be executed and be currently in force in order for this SLA Addendum to apply to the Network.

4. Data Center Performance Standards

We evaluate the performance of our Data Centers as follows:

4.1. For customers with redundant dedicated power circuit pairs (otherwise known as "A & B" circuits), electric feed will be available 100% of the time over at least one of the two circuits in each dedicated power circuit primary & secondary ("A & B") pair.

4.2. The following environmental specifications will be met at our data centres at all times: an ambient temperature of 68 to 74 °F (average/setpoint of 71 °F) and at Relative Humidity (RH) of 25% to 55% (average/setpoint of 40%).

4.3. All cross-connects, provided by us wholly within our data centers, will be available 100% of the time.

4.4. Data Center Service customers experiencing an outage or emergency should call the 24x7x365 Data Center or Global Support at the phone number provided. All calls will be answered by a live technician in under five (5) minutes.

4.5. For customers with our provided managed hardware, any malfunctioning hardware will be repaired or replaced within under two (2) hours from the time a ticket is open, identifying the issue and requesting/authorizing the hardware replacement or repair.

4.6. The evaluation criteria set out in this paragraph is collectively referred to in this SLA as the Data Center Performance "Standards."

5. Data Center Performance Measurement

We maintain internal systems, logs and journals, which measure the Standards as follows:

5.1. Managed, metered in-rack power bars which measure the utilization and uptime of customer "A & B" dedicated power circuits;

5.2. Regular facility walk-throughs recording status, and relevant readings, of all critical systems (such as UPS systems, PDU units, and HVAC systems);

5.3. Numerous thermostats throughout the facility, measuring the data center temperature and humidity on an ongoing basis;

5.4. Global phone system logs that include detailed information on all customer phone calls, including caller ID, response time, talk time, technician(s) handling the call, and queue time (if any); and

5.5. Global ticket system, which records all ticket activity and the time thereof, such as customer request(s) and authorization(s), our response(s), diagnosis and work performed. This is recorded for all customer trouble tickets/requests.

5.6. Exclusions:

5.6.1. Customer power circuits which are not in the recommended "A & B" redundant circuit pairs;

5.6.2. "A & B" redundant power circuits where our managed, metered in-rack power bar is not in exclusive use on the secondary power circuit;

5.6.3. "A & B" redundant power circuits where customer has exceeded 80% of the single circuit rated Amperage draw as an aggregate total across both circuits in a redundant pair, or, if managed, metered power bar is only in use on secondary and not on primary circuit, where secondary circuit usage has exceeded 1.0 Amps at any time while the primary power circuit is in use;

5.6.4. Temperature in the designated hot aisles and as measured next to any equipment hot air exhaust fan;

5.6.5. Temperature in, or around, any customer racks where more than 120 Amps at 110V or more than 60 Amps at 208V (or any combination thereof) is in use, unless prior arrangements for additional cooling capacity in the said racks have been made and implemented and an SLA exclusion waiver granted;

5.6.6. Third party measurements of the Standards, including those you maintain, are not accepted as evidence that the Standards have not been met;

5.6.7. Any maintenance activity on cross-connects performed during previously announced maintenance windows; and

5.6.8. Data Center phone support service during an emergency situation at, or affecting, the data center, as long as such an emergency situation has been announced to customers.

6. **Network Performance Standards**

We evaluate the performance of the Network as follows:

6.1. The Network will be available and functional, i.e., having a path available for the flow of data packets, 100% of a 24-hour day, at its core and distribution layer, excluding scheduled maintenance and upgrades. We will inform you in advance of such maintenance if you have chosen to subscribe to the relevant updates list in http://mycp.hopone.net (only Customers subscribed to this update list will receive scheduled maintenance notifications). The fact that notice is not received by you shall not be evidence that Network unavailability is not scheduled maintenance. One device (e.g., router or switch) or circuit/link being down for scheduled or unscheduled maintenance, regardless of for how long, at locations where the device or circuit/link is redundant (i.e., another device or circuit/link (or multiple ones thereof) is capable of taking on the load of the one that is down), shall not be classified as Network unavailability.

6.2. There will be no packet loss in our internal network (i.e., between the core routers and distribution switches at the same PoP/Data Center, or between core routers at different PoPs/Data Centers), or from our core router through which we connect to a Tier 1 provider to the next Internet route hop at the Tier 1 provider's end (at the POP where we connect to it). For the purposes of this SLA, the term "Tier 1" shall mean the generally acknowledged and accepted Tier 1 Internet backbone providers, having a national or international Internet network, with whom we directly connect.

6.3. Latency shall be 3 milliseconds (ms) or less from one core router to another, or to a distribution switch, at the same Data Center or PoP, or from core router at one PoP or Data Center to a core router at a different PoP or Data Center within the same metro area (under 50 mile distance), and from our core router through which we connect to a Tier 1 provider to the next Internet route hop at the Tier 1 provider's end (at the POP where we connect to it), and from our core router through which we connect to any private peer or peering exchange. This excludes any Tier 1 providers, private peers or peering exchanges where the connection is 50 miles or more away from the relevant core router, or any peering exchange fabric caused issues or peer-end issues. Latency shall be less than 100 ms

between any point on our network on the East Coast to any point on our network on the West Coast, and vice versa, less than 30 ms from any point along one coast to any other point along the same coast, and less than 10 ms within the same greater metropolitan area (over 50 mile distance).

6.4. IP Transit customers experiencing an outage or emergency should call the 24x7x365 NOC at one of the NOC phone numbers provided. All calls will be answered by a live technician in under five (5) minutes.

6.5. The evaluation criteria set out in this paragraph is collectively referred to in this SLA as the Network Performance "Standards."

7. Network Performance Measurement

We maintain internal systems, logs and journals, which measure the Standards as follows:

7.1. Generally, a 30 consecutive day average of all statistical data is used to determine whether our Network has met the Standards;

7.2. Connectivity Standards for the Network's latency and packet loss objectives are measured over the 30 consecutive day period for each particular path or route;

7.3. Network availability (uptime) standards are measured for each Network PoP, or Data Center, core and distribution layer as a whole, using instantaneous measurements instead of averages; and

7.4. Global phone system logs that include detailed information on all customer phone calls, including caller ID, response time, talk time, technician(s) handling the call, and queue time (if any).

7.5. Exclusions:

7.5.1. Instantaneous measurements of the Standards are not accepted as evidence that the Standards have not been met, with the exception of any Network PoP core (as a whole) and/or distribution (as a whole) layer uptime, where instantaneous measurements are used;

7.5.2. Third party measurements of the Standards, including those you maintain, are not accepted as evidence that the Standards have not been met; and

7.5.3. NOC phone support service during a network emergency, as long as such an emergency situation has been announced to customers.

8. Remedies

8.1. Our Provided Managed Hardware Customers:

8.1.1. Should any hardware component fail on hardware that we are currently providing to you on a managed hardware basis, we will use commercially reasonable efforts, at our own cost and expense, to replace the defective component(s).

8.1.2. We will store commonly used parts for current standard configuration managed hardware on the site where the affected hardware is located. For parts that are so stored, we shall commence efforts to replace the defective components, or replace the hardware in its entirety with a same or similar model, within 2 hours of our confirmation of the failure and its diagnosis by us. For each additional full 2 hour period during which we are unable to replace the defective components, or replace the hardware in its entirety with a same or similar model, following our diagnosis and confirmation performed (which is not a part of this 2 hour period), you will be entitled to credit for 1 day Equipment Rental, or, if applicable, Lease-To-Own fee. For custom parts that are not commonly used or for non-standard specialty hardware (which has been designated as such at the time of order), the replacement time of which is not governed by this SLA, we will act on a commercially reasonable basis to obtain the part(s) as soon as reasonable and then replace the failed part(s) with the new part(s).

8.1.3. The remedies set out in these subparagraphs shall apply to you if your Agreement with us includes: (i) an Equipment Rental Addendum; and/or (ii) a Lease-to-Own Addendum during the time prior to the transfer of ownership of the hardware to you. The term "hardware" as used herein specifically excludes any hardware owned by you, including hardware that you have purchased from or through us and on which we are not providing a current managed hardware service.

8.2. Data Center Service Customers:

8.2.1.   During each calendar month, for each full hour (rounded up from 31 minutes; rounded down from 30 minutes) in which electric feed is simultaneously not available on both dedicated power circuits in a redundant "A & B" circuit pair, you will be entitled to a 1 day affected power circuit fee (for both primary & secondary circuit) credit.

8.2.2.   During each calendar month, for each day (measured 00:00-23:59 in local data center time) during which the environmental specifications are not met, as an average of all environmental readings taken by us over that day at the data center, you will be entitled to a 1 day affected racks and/or cabinets colocation fee credit.

8.2.3.   During any unique support incident, that does not fall during emergency circumstances (as determined by us, and only if so announced by us to affected customers) at the data center, if any phone call from you to request emergency/immediate response or service is not answered by a live technician within under five (5) minutes, you will be entitled to a 1 day affected service fee credit.

8.2.4.   Only one of the credits specified in clauses 8.2.1, 8.2.2 or 8.2.3, of your choice, or if you have not indicated your choice with your initial credit request, then of our choosing (which may not be later changed by you), may be applied at a time to any affected service, and never more than one in combination or conjunction on the same affected service for the same day. In case of multiple affected services in the same incident or in overlapping or otherwise related incidents, however, one service credit (of your choosing) can be applied to each affected service.

8.3. IP Transit (Network Service) Customers:

8.3.1.   During each calendar month, for each full hour (rounded up from 31 minutes; rounded down from 30 minutes) in which the Network fails to meet the uptime standards detailed in 6.1, you will be entitled to a 1 day affected IP transit fee credit.

8.3.2.   During each calendar month, for each 1% of packet loss (rounded up from 0.51%, but not until it reaches first 1.0%; rounded down from 0.50%) on our Network, you are entitled to a 1 day affected IP transit fee credit.

8.3.3.   During each calendar month, for each additional 3 ms of latency (rounded up from 1.6 ms, but not until it reaches first 6.0 ms; rounded down from 1.5 ms) above the guaranteed amounts, you are entitled to a 1 day affected IP transit fee credit.

8.3.4.   During any unique support incident, that does not fall during network emergency circumstances (as determined by us, and only if so announced by us to affected customers), if any phone call from you to our NOC to request emergency/immediate response or service is not answered by a live technician within under five (5) minutes, you will be entitled to a 1 day affected IP transit fee credit.

8.3.5.   Only one of the credits specified in clauses 8.3.1, 8.3.2, 8.3.3 or 8.3.4, of your choice, or if you have not indicated your choice with your initial credit request, then of our choosing (which may not be later changed by you), may be applied at a time for any one incident or group of overlapping incidents, and never more than one in combination or conjunction. In case of multiple affected services in the same incident or in overlapping or otherwise related incidents, however, one service credit (of your choosing) can be applied to each affected service.

8.4. Certain failures to meet Performance Standards:

You will have the option to immediately terminate a particular Service if any of the following conditions take place:

8.4.1.   More than 1% (7.2 hours) simultaneous electric supply downtime on both the "A & B" redundant power circuits in a redundant circuit pair over a consecutive 30-day period;

8.4.2.   More than 1% (7.2 hours) Network downtime (defined as your switch or router, which must be redundantly connected to at least two (2) of our distribution switches or routers, not having Internet connectivity, excluding due to failure or misconfiguration of your server, router or switch hardware or software, due to your cabling, due to a Denial of Service attack, hacking, or similar, or due to a cross-connect not provided entirely by us) over a consecutive 30-day period;

8.4.3.   Higher than 5% packet loss on the Network over a consecutive 30-day period on average;

8.4.4.   Higher than 20 ms latency above any of the guaranteed levels on the Network over a consecutive 30-day period on average; or

8.4.5.   Over 24 hours downtime (i.e., not connected and reachable, with measurement starting from the time that the issue has been diagnosed and we have been authorized to repair or replace the affected hardware) of your hardware, that is provided and managed by us.

Your selection of this Remedy must be exercised within thirty (30) days of the first occurring condition. This Remedy may not be exercised in combination with any other remedies. This Remedy only applies to the Service(s) directly affected by the condition(s) indicated above. The provisions of the Agreement(s) governing your Services shall continue to apply to all unaffected Services, and to all affected Services if the termination Remedy is not exercised within thirty (30) days of the first occurring condition.

9. Requesting Credit

9.1. You must contact us within thirty (30) days from the date on which any Performance Standards are first not met.

9.2. You are entitled to request a remedy set out in paragraph 8 (a "'Remedy") for only one failure of any particular Service to meet the Standards on any day. If you fail to choose a remedy where multiple remedies apply, then we will choose one for you. Our choice shall be binding.

9.3. To be valid, your Remedy Notice must be submitted in writing by you via our myCP® tool.

9.4. The Remedy Notice must contain:

- Sufficient information about the failure of the Service to meet the Standards so as to enable us to review our records and validate your claim;
- Include any and all trouble ticket number(s) open concerning the failure;
- Your choice of Remedy; and
- Be designated a "SLA Credit Request" in myCP®.

Your failure to comply with these requirements releases us from any requirement to provide you with a Remedy. The fact that a defective Remedy Notice was rejected by us does not result in an extension of time in which to submit your corrected Remedy Notice.

9.5. Upon receipt of a complete Remedy Notice, we will review our records and investigate your claim. You will receive the requested Remedy on your next invoice or a response from us within 20 days of our receipt of your Remedy Notice. Current outstanding invoices will not be reissued and credit may not be claimed until it is given on the next invoice issued.

9.6. If we are unable to validate your claim, we will provide you with the description of the data we have reviewed and on which we based our decision.

9.7. In order to submit an SLA Credit Request your account must be in good standing and have no overdue amounts owed. You are not entitled to any Remedy if your account is not in good standing, or has not been in good standing during failure of the Service to meet the Standards or at any time thereafter. The fact that your account is not in good standing will not cause the deadlines set out in this SLA to be altered.

10. General

10.1. The provisions of this SLA are the sole and exclusive measurements of the Standards. No other performance levels are part of the Standards, nor part of your Agreement with us.

10.2. Your selection of a Remedy, or failure to do so, is your sole and exclusive remedy for any failure of our Data Center Service or Network.

10.3. This SLA may be revised from time to time. During the Term, this version of the SLA will be applied. However, during any Renewal Terms, the then-current revised SLA will apply. New Services purchased from us will be also subject to the then-current revised SLA. It is your obligation to request a copy of the most recent SLA prior to any Renewal Term, or purchase of additional Services.

Colocation

(provided by HopOne Internet Corp.)

SIN	Product Name	Product Description	GSA Catalog w/ IFF (one time set-up fee)	GSA Catalog w/ IFF (monthly recurring charge)
132-52	Colo-Half Rack	1/2 Open Rack (20U), includes a 120 Volt, 20 Amp dedicated power circuit	$957.13	$445.06
132-52	Colo-Full Rack (Open)	1 Open Rack (42+U), includes a 120 Volt, 20 Amp dedicated power circuit	$1511.25	$538.76
132-52	Colo-Dedicated Private Cabinet	1 Locking Cabinet (42+U), includes a 120 Volt, 20 Amp dedicated power circuit	$1763.13	$609.03
132-52	Colo-Tower	Shelf for Tower Servers (2~2.5 racks/cabs footprint), includes a 120 Volt, 20 Amp dedicated power circuit	$1,511.25	$726.16
132-52	Colo-AP-120V-20A	Additional Power: a 120 Volt, 20 Amp dedicated power circuit (2.4 kW). Primary "A" circuit.	$503.75	$351.37
132-52	Colo-AP-120V-30A	Additional Power: a 120 Volt, 30 Amp dedicated power circuit (3.6 kW). Primary "A" circuit.	$604.50	$529.39
132-52	Colo-AP-208V-20A	Additional Power: a 208 Volt, 20 Amp dedicated power circuit (4.4 kW). Primary "A" circuit.	$755.63	$702.73
132-52	Colo-AP-208V-30A	Additional Power: a 208 Volt, 30 Amp dedicated power circuit (6.6 kW). Primary "A" circuit.	$1,259.38	$1,054.10
132-52	Colo-AP-240V-60A	Additional Power: a 240 Volt, 60 Amp dedicated power circuit (3-phase 20 Amps at 240 Volts). Primary "A" circuit.	$1,763.13	$2,108.19
132-52	Colo-AP-RC-120V-20A	Additional Power - Redundant "B" Circuit: a 120 Volt, 20 Amp dedicated power circuit (2.4 kW). Redundant "B" circuit (must be paired with a matching primary "A" circuit).	$730.44	$176.15
132-52	Colo-AP-RC-120V-30A	Additional Power – Redundant "B" Circuit: a 120 Volt, 30 Amp dedicated power circuit (3.6 kW). Redundant "B" circuit (must be paired with a matching primary "A" circuit).	$831.19	$265.16
132-52	Colo-AP-RC-208V-20A	Additional Power - Redundant "B" Circuit: a 208 Volt, 20 Amp dedicated power circuit (4.4 kW). Redundant "B" circuit (must be paired with a matching primary "A" circuit).	$982.31	$351.37
132-52	Colo-AP-RC-208V-30A	Additional Power - Redundant "B" Circuit: a 208 Volt, 30 Amp dedicated power circuit (6.6 kW). Redundant "B" circuit (must be paired with a matching primary "A" circuit).	$1,486.06	$527.52
132-52	Colo-S-CC-HO	Supplementary Colocation Services: Cross-connects to hopone.net	$0.00	$0.00
132-52	Colo-S-CC-Self	Supplementary Colocation Services: Cross-connects to self (remote, non-adjacent)	$403.00	$234.24
132-52	Colo-S-CC-TP	Supplementary Colocation Services: Cross-connects to third party (at HopOne data center)	$604.50	$234.24
132-52	Colo-S-CC-Ext	Supplementary Colocation Services: Cross-connects to third party (within third-party data center) or extended cross-connects	$1209.00	$468.49
132-52	Colo-S-T-M-1G	Supplementary Colocation Services: Local Metro Area 1 Gb/s (GigE) Transport Circuit/Wave	$1914.25	$957.12

		(unprotected), from data center to an on-net location [36m term req.]		
132-52	Colo-S-T-M-10G	Supplementary Colocation Services: Local Metro Area 10 Gb/s (10 GigE) Transport Circuit/Wave (unprotected), from data center to an on-net location [36m term req.]	$3929.25	$2342.44
132-52	Colo-S-T-LH-1G	Supplementary Colocation Services: Long-Haul 1 Gb/s (GigE) Transport Circuit/Wave (unprotected), from data center to an on-net location [36m term req.]	$6851.00	$4029.00
132-52	Colo-S-T-LH-10G	Supplementary Colocation Services: Long-Haul 10 Gb/s (10GigE) Transport Circuit/Wave (unprotected), from data center to an on-net location [36m term req.]	$14911.00	$12040.13
132-52	Colo-S-MS-AS	Managed Services: On-demand, Advanced Scheduled (rate per hour)	$0.00	$120.90/hour
132-52	Colo-S-MS-I	Managed Services: On-demand, Immediate (rate per hour)	$0.00	$241.80/hour
132-52	Colo-PP-10	10 hours per month (scheduled) or 5 hours (immediate)	$0.00	$890.13
132-52	Colo-PP-25	25 hours per month (scheduled) or 5 hours (immediate)	$0.00	$1,827.10

- Power draw must be below 1 Amp at all times on redundant "B" circuits. If it is exceeded at a time when primary circuit is operational, the redundant "B" circuit will become a regular primary "A" circuit.
- Over 60A @ 208V or 120A @ 120V power per rack or cabinet may incur additional NRC & MRC fees for hot spot custom/additional cooling (applicable to all additional "overage" power circuits).
- **There are no "per KVA", "per KW" or any other such hidden charges.** Pricing is budget friendly: simple and predictable, non-variable.
- Minimum 1 year term commitment required.
- On transport circuits/waves, a 3 year term is required.
- Prepaid Support Services: Any unused time does not carry over to the next billing month.

IP Transit Services

132-52	IP-DGE-600	Dedicated Gigabit Ethernet (1 Gb/s) - 600 Mb/s commit, fully burstable	$0.00	$4,216.39
132-52	IP-DGE-800	Dedicated Gigabit Ethernet (1 Gb/s) - 800 Mb/s commit, fully burstable	$0.00	$4,872.27
132-52	IP-DGE-1000	Dedicated Gigabit Ethernet (1 Gb/s) - 1000 Mb/s	$0.00	$5,153.36
132-52	IP-D10E-1000	Dedicated 10 Gigabit Ethernet (10 Gb/s) - 1000 Mb/s commit, fully burstable	$0.00	$5,621.85
132-52	IP-D10E-2000	Dedicated 10 Gigabit Ethernet (10 Gb/s) - 2000 Mb/s commit, fully burstable	$0.00	$9,369.75
132-52	IP-D10E-4000	Dedicated 10 Gigabit Ethernet (10 Gb/s) - 4000 Mb/s commit, fully burstable	$0.00	$16,865.55
132-52	IP-D10E-6000	Dedicated 10 Gigabit Ethernet (10 Gb/s) - 6000 Mb/s commit, fully burstable	$0.00	$22,487.40
132-52	IP-D10E-8000	Dedicated 10 Gigabit Ethernet (10 Gb/s) - 8000 Mb/s commit, fully burstable	$0.00	$24,361.35
132-52	IP-D10E-10000	Dedicated 10 Gigabit Ethernet (10 Gb/s) - 10000 Mb/s	$0.00	$25,766.81
132-52	IP-S-IN-Cisco2950G	Supplementary Network Services - Internal Networking: Managed Cisco 2950G-48 EI switch (2xGigE, 48xFastE)	$146.09	$42.16
132-52	IP-S-IN-Cisco2960G	Supplementary Network Services - Internal Networking: Managed Cisco WS-C2960G-24TC-L switch (20xGigE, 4xSFP)	$196.46	$70.27
132-52	IP-Allocation	Each IP Allocation Instance	$151.13	$0.00

132-52	IP-Allocation-256	Per IP (up to 256)	$0.00	$1.87
132-52	IP-Allocation-256Plus	Per IP (over 256)	$0.00	$3.75
132-52	VLAN-Private-Front	Private (front end) VLAN	$755.63	$327.94
132-52	VLAN-Private-Back	Private (back end) VLAN	$251.88	$0.00
132-52	BGP-New	New BGP session set-up	$755.63	$0.00
132-52	BGP-Mod	BGP settings modification (periodic, weekly or lesser frequency, updates such as AS-list and prefix-list are exempt)	$251.88	$0.00
132-52	BGP-IP256	Each /24 Allocation (only applies if customer does not have own IP space)	$251.88	$468.49

- Minimum 1 year term commitment required.
- IP Allocation & VLANs: applicable to non-BGP customers only. All IPs must be justified.
- BGP Services: BGP customers only. BGP4 routing is provided at no charge for IPT customers with their own ASN.

Dedicated Servers
