Abbott Molecular is an emerging leader in molecular diagnostics and the analysis of DNA, RNA, and proteins at the molecular level. We are committed to exploring new clinical frontiers through the development and delivery of system and assay solutions that are designed to provide earlier disease diagnosis, selection of appropriate therapies and monitoring of disease recurrence. Our expanding portfolio brings multiples technologies that enable fast, accurate results. Our state of the art research and manufacturing facilities have hundreds of scientists who are dedicated to producing quality and reliable products.

Over 350 products are available in the areas of infectious disease, oncology, genetics, and automation. Some of the products include the *m2000* system which has an extensive assay menu in infectious disease featuring Abbott RealTime technology with a broad range of assays available. The PathVysion HER-2 DNA Probe Kit for breast cancer and the UroVysion Bladder Cancer Kit are important applications of the FISH technology.
